PROHIBITION FACING A SUPREME TEST

WITH OUTCOME IN DOUBT FEDERAL CHURCHES FINDING

Unwelcome Effects of Regime
Are Cited Drinking Among
Minors Is More Prevalent
—And Respect for Law
Wanes It Is Stated—Pass-
ing of Saloon Is Accepted
With Satisfaction.

A belief that prohibition in the United States is facing a supreme test with the final outcome in doubt was expressed in a report compiled after months of investigation by the Research and Education Department of the Federal Education of Churches Many Claims Made.

"No one can say with positiveness what the ultimate outcome of this test will be," said the report. "No cocksure optimism is warranted, nor is pessimism or 'defeatism' justified by the facts. Much seems to depend upon the development of public opinion in the near future."

"An unfavorable and disquieting" trend since 1920 in the social consequences of prohibition was seen by investigators in statistics gathered from many sources, but the report declared no available statistical data could be accepted as conclusive and pointed out that the wholesome effects of prohibition are registered in inconspicuous ways which cannot be reduced to statistical tabulation.

Many claims made by those on both sides of the controversy were discarded as virtually worthless. Publicity material circulated with a view to influencing public opinion was declared to have been based largely on questionable data.

"Prohibition publicity has suffered much," said the report "from careless and unwarranted inferences. Much of the publicity given out by the prohibition unit in the treasury department has been of the unfortunate kind. On the other hand, much unjust and misleading propaganda has been put out for the purpose of discrediting prohibition."

On the question of public sentiment the report declared there could be little doubt as to the mood of the country when prohibition was adopted, but that since that time various elements had somewhat complicated the situation. On one subject, however—the saloon, the evidence appeared more decisive. It was said that "there seems to be not the least doubt that the country has accepted with satisfaction the passing of the saloon."

Data Is Saved.

Most of the data compiled in the investigation was reserved for future disclosure, but the section of the report made public contained two sets of figures.

One summarized the responses to a questionnaire sent out to members of the National Conference of Social Work, a majority of whom reported conditions in the homes of the poor improved in various ways under prohibition, that children's delinquency was decreasing and that liquor was less accessible than formerly to minors, but that drinking among young people had increased as compared to pre-prohibition times and general respect for law had decreased.

The other tabulation related to intemperance as a factor in dependency, and was summarized in the report as showing that altho there was "a sharp drop" in such cases about 1920, there has been "very decided and fairly" consistent increases since that date altho "there is an encouraging number of cities that report decreases in 1924."

The report, other sections of which are to be made public daily over the

coming week, was prepared under direction of the Rev. F. Ernest Johnson, head of the Federal Council's Research and Education department. In a foreword, he declared the study had been undertaken in order to give a "fair appraisal," unbiassed by personal opinion and uninfluenced by the great mass of current literature which had emanated from biased sources.

MILL OWNER CHARGED WITH EMBEZZLEMENT

Hearing on the extradition of C. C. Traux, formerly of Delphos, Ohio, for the alleged embezzlement of \$5,000 from the Del Carmen Land Co., of Bluefield, West Virginia, was resumed Saturday morning before Governor Donahey. Executive Secretary James W. Huffman is taking the evidence in the case. Traux recently was arrested here by local authorities on complaint of West Virginia officials that he was a fugitive from justice. A former attempt at extradition was denied.—Columbus Dispatch.

Mr. Traux was a former general manager of the Dixie Mills, this city, and is now sole owner of the Maizo Mills.

Current Styles in Hats Reflected in Neckwear

Many handsome autumn hats present themselves in the company of neck pieces made to match. This pretty whim of fashion reveals scarfs, chokers or collarettes of silk, velvet, felt or velours, endlessly varied and very chic. The hat and choker pictured are made of black velvet, brightened by gay coin dots of narrow silk braid in three colors.

FORD CAR WRECKED

The Ford touring car of Mr. and Mrs. Tom Thomas, of Walnut street, was wrecked on the pike near Columbus Sunday evening by a passing auto. None of the occupants of the Thomas car were injured.

FELL FROM SWING

Robert Rector, son of Mr. and Mrs. Edward C. Rector of Kinderhook, fell from a porch swing at his home last Thursday and sprained his right wrist.

BIRTHS

To Mr. and Mrs. Clarke Marion, of Hamilton, Monday, September 14, 1925, a son. The father is a son of Mr. and Mrs. W. H. Marion of East High street.

ONE IN A THOUSAND

Solomon's 777th wife.—Sol. are you really and truly in love with me? Solomon—My dear, you are one in a thousand. Ase she snuggled closer.

Storm Does Vast Damage in Detroit and Environs

This photograph shows a Detroit street with roadway ruined by a recent rain storm which caused over \$1,000,000 worth of damage, inundating large areas, flooding cellars, washing away pavements, ripping up gutters and seriously crippling transportation in the city.

CONSTITUTION DAY SET ASIDE BY GOVERNOR

Fixes Sept. 17 as Time for all
Citizens to Consecrate
Themselves Anew.

September 17 was proclaimed Constitution day, Saturday by Governor Vic Donahey, in an official proclamation, calling attention to the disregard that many persons have of the American constitution.

"The doctrine that the governed should have a voice in the making of the basic laws for their protection has persisted from the earliest times, but did not come to final fruition until the founding of the United States of America," said the governor. "No more perfect theory of justice was ever advanced than that written into our federal constitution. The patriotic and liberty-loving authors of that document handed to posterity a legacy that has proved to be one of the greatest achievements consummated by mankind."

"One hundred and thirty-eight years have witnessed the actual working of federal constitution in the development of our political, social or economic structure. With the exception of a few supplementary amendments, we still abide by the dictates laid down for us by the fathers at the crucial infancy of our country. Ours is the oldest written constitution in the world and so long as the people rule their government it will continue to exist, but if the government is permitted to rule the people it is not a far cry until our nation will be numbered with others that have passed out of existence," the proclamation reads.

"There are those who profess alarm at the growing disrespect for laws, and the time is opportune for all citizens to consecrate themselves anew to strict law observance and to the study of our constitution. For its destruction we need have no fear. It has stood the acid test."

"All American citizens should have a thorough understanding of this remarkable, world-famous document. Its provisions may be understood by everyone, as ambiguity is lacking."

MISSION LASS MAKING FIGHT FOR HER LIFE

Unknown Assailant Attacks
Alberta Perry as She Lay
Asleep Beside Her Mother.

Columbus, Sept. 14 (UP).—Alberta Perry, 14 years old, is near death in a hospital here suffering loss of blood when her throat was slashed by an unidentified assailant as she lay asleep beside her mother here early Sunday.

The young girl is a singer at Salvation Army services. Police have been unable to discover any motive for the crime.

Muddy footprints were found on the sill of the kitchen window but there were none upon the floor. Police believe the girl's assailant was a "ripper" who entered the house after the family had retired.

The razor cut in her throat slashed the jugular vein and only the action of Police R. E. Wynn in holding it closed with his fingers until the girl reached the hospital, saved her from death by loss of blood.

Miss Flora Dunlap, of Des Moines, Iowa, is the guest of her parents, Mr. and Mrs. S. W. Dunlap, of South Court street.

COMPOSERS MUSICAL NOTES ARE SILENCED

William H. May, Tutor and
Composer of Music Dies at
Radium Hospital Sunday.

William H. May died at the Radium hospital, Columbus, Sunday at noon, where he was taken last Friday for treatment. His death was due to intestinal trouble and appendicitis.

The deceased was a tutor and composer of music and had made his home in Washington C. H., since 1887.

Mr. May was 70 years of age. He was born in Gorgansville, North Carolina, and was the son of Dr. John W., and Elizabeth Ann Wilson May.

He was twice married. His first wife was Miss Mollie Jennings of Atlanta. She died in 1889. In 1893 he married Miss Pinta V. Stokesbury, of Washington C. H., who survives; also Carroll H. May, of Columbus, a son by his first wife.

Of his immediate family one brother, Dr. John B. May, of New Holland, is living. He was an uncle of Attorney Charles H. May, of this city.

The deceased was a member of the Dublin Hill Methodist church until 1887, when he changed his membership to the Methodist church at Washington C. H. Socially he was a member of the Knights of Pythias lodge.

Arrangements have not been made for the funeral.

VETERAN OF THE CIVIL WAR ANSWERS TAPS

Father of Seventeen Children
Died at Ashville Friday,
Burial at Williamsport.

Morris Hafey, a veteran of the Civil war, died at his home in Ashville Friday, September 11. Deceased was a son of John and Mary Dwyer Hafey, natives of Ireland, and he was born at Briston, England, February 28, 1843. He was twice married, the father of 20 children, 17 of whom survive.

The funeral services were held from St. Joseph's church Monday morning at 9 o'clock Rev. Father J. S. Hannan officiating. Interment was in Springlawn cemetery, Williamsport.

E. F. Roebuck was a visitor in Detroit, Michigan, over Sunday.

PERSONALS

W. C. Baldwin was a business visitor in Columbus today.

Miss Frances Boecher of Hallsville is the guest of Miss Louise Renick.

Mrs. G. L. Schiear and daughter, Mary Jane, spent the day in Columbus.

Mrs. Lemuel James accompanied by Miss Elizabeth Frey left Monday for the White Mountains.

Miss Rebecca Gordon has secured a position as teacher in the public schools at Clarington, Ohio.

John Shaw, of Utica, New York, who has been the guest of his wife at New Holland, has returned.

Miss Gladys Boyer, of Stoutsville, will take a course in training at the White Cross hospital, Columbus.

Lucille Myers, of Stoutsville will leave next week for Cincinnati where she will take a course at a business college.

Miss Winnifred Huddle, of Stoutsville, left today for Cincinnati where she will enroll as a student at the University of Cincinnati.

Mrs. Rose Miller, of Columbus, who has been the guest of her parents, Mr. and Mrs. Wilson Valentine, at Stoutsville, has returned home.

Robert Kefauver, son of Dr. and Mrs. Kefauver, of Stoutsville, left today for Tiffin where he will enter the sophomore class at Heidelberg college.

Carl Frazier, on of Mr. and Mrs. Oscar Frazier, who spent his vacation at his home in Stoutsville will leave this week for Washington D. C., where he will teach ancient history in the university.

Miss Lillie Bond, of Wauseon, who attended the Bolender family reunion remained over and is the guest of her cousin, Miss Ida Bolender. The latter is seriously ill. Miss Bond will remain until the Pumpkin Show.

Miss Mary Holman left Saturday for Washington D. C., where she has secured a position with the board of Children's Guardians of the District of Columbia. Miss Holman will do welfare work and will have charge of the placing department.

Milton Friedman, who has been across the seas in London, England, for the past three months with his brother, Ted Lewis, on a two months' engagement, has returned home. His brother and wife accompanied him as far as New York City.

Open Church on Heights of Shenandoah Mountains

Orkney Springs, Va.—Consecration ceremonies for the Shrine of the Transfiguration, an edifice of native, unhewn stone erected on the heights of the Shenandoah mountains to the memory of prominent clergymen and laymen of the Episcopal church in Virginia, drew a large assembly of church representatives here.

Bishop William Cabell Brown of Virginia was the presiding dignitary for the ceremony.

NEWS ABOUT COURT HOUSE

General Happenings Taken
From the Records of the
Various County
Offices.

Compounding A Claim.

Jacob Young and Flora Murray, administrators of the estate of Henry Phillips, deceased, have filed an application in the probate court of Pickaway county, asking for an order or the court directing them to compound a claim of said estate against the estate of Susana Adams, deceased, amounting to about \$3,211.

The claim is evidenced by a note for \$1300 secured by mortgage on 21.57 acres of land in Fairfield county. The note and mortgage is dated March 26 1892. George G. Adkins represents the administrators.

Marriage License.

Bryan Riffe, 29, farmer, and Edna Waite, 33, both of Saltcreek township.

HAD 286 OPERATIONS

George Gillespie, thirty-seven, Pittsburg (Pa.) police sergeant, is now recovering from his two hundred sixty-eighth operation. The operations followed injuries suffered in an automobile accident two years ago. Nineteen of them were major ones. Gillespie by his latest operation lost a leg.

Cites Big Drop in Crime in Britain in 50 Years

London.—Better education, an increase in sobriety and an advanced standard of living have resulted in a tremendous decrease of crime in England in the last 50 years, Sir William Joynton-Hicks, home secretary, told the International Prison Congress.

He said that in 1875 there were 10,000 persons undergoing penal servitude. Now, he said, there are only 1,600 in spite of the increase of population. Besides this number there are 1,100 young people undergoing correctional treatment.

SOCIETY SHOCKED; WEDDINGS ARE OFF

Two American Girls Are Not to Be Brides of Titled Foreigners.

New York.—The marriage plans of two American society girls and two blue-blooded foreigners, have gone awry.

Miss Emmeline Marion Grace, daughter of Eugene G. Grace, president of the Bethlehem Steel corporation, is not to wed Sir Michael William Shelby Bruce, adventurous young Scottish baronet, because he is to marry an English girl.

Dispatches from London said that Sir Michael, a captain in the royal field artillery, and alleged descendant of Robert Bruce, hero king of Scotland, would become the husband of Miss Doreen Dalziel Greenwell, daughter of a British army colonel.

Engagement Ball Held.

Miss Grace's engagement was announced by her parents last December from their home in Bethlehem, Pa. It was celebrated by a ball at the Hotel Bethlehem. Mr. Grace's secretary from the steel magnate's summer home at Southampton, L. I., recently, said Miss Grace's engagement was broken several months ago and that this fact was known to her friends here and in London.

Disappointment came to Lieut. Ernesto Lardinecci Becci, first assistant secretary of the Italian ministry of the interior, when he arrived on the liner Providence to learn that his contemplated marriage to Miss Nancy Sayles of Pawtucket, R. I., has been postponed indefinitely.

Will Return to Italy.

A few hours later Lieutenant Becci intimated he would return to Italy without a bride. Miss Sayles is reputed to be the wealthiest girl in Rhode Island.

Her mother, Mrs. Frank A. Sayles, gave no reason for postponement of the marriage.

Lieutenant Becci is a Roman Catholic and Miss Sayles a Protestant.

Lieutenant Becci left \$37,500 in jewelry, his gifts to the prospective bride, in the hands of custom officials. He didn't want, he said, to pay duty on something he might not need.

Use Coney Island Police as Nurses for Children

Albany, N. Y.—The latest method employed by mothers in disposing of their children so they may be free to enjoy the sights and pleasures of Coney Island has been revealed by the state commission of prisons. It is intentional abandonment in the vicinity of an obliging policeman with the certain knowledge that the child will be picked up and cared for during the day at the Coney Island police station.

The method is cited in a report made public of an inspection by the commission of the state, the Twenty-eighth precinct of New York city. The inspection was made July 4, and it was found that 75 children were brought into the station house on that day up to 9 p. m. A total of 1,200 "lost children" had been cared for at the station up to that date, most of them since early in May.

"It seems to be pretty well established," says the report, "that many women coming to Coney Island, bringing their children with them, purposely abandon them knowing they will be taken up by the police and kept until after they have finished their day of pleasure, after which they call at the station and recover them. It is also quite certain that few children stray from their parents unless the parents are careless or are not much concerned as to their safety and welfare."

Polish Government Has Four Big Monopolies

New York.—The establishment of a match monopoly by the Polish government, which, as recently announced, will be operated for 20 years jointly by an American and Swedish corporation, brings the number of state monopolies in Poland to four. The others are alcohol, tobacco and salt.

Revenues from the existing monopolies during the first quarter of 1925, official reports received by the American-Polish chamber of commerce show, amounted to \$15,999,000. The budget estimates for the current year anticipate total net receipts from the existing monopoly, at \$78,000,000.

Profits from the monopolies will constitute about 18 per cent of the government's revenues this year.

The alcohol monopoly is expected to yield \$20,000,000 in 1925, the first year of its operation.

Well More Than a Mile Deep

Syracuse, Kan.—What is claimed to be the deepest well in Kansas is the oil test being drilled a few miles southwest of Syracuse. The hole is now down more than a mile. The drilling of the well has been in progress many months and in spite of the great depth that has been reached the drillers have no notion of stopping.

Methodists to Found School

New York.—A new university will be established at Kansas City, Mo., by the Methodist Episcopal Church South and the Methodist Episcopal church, with the co-operation of the city chamber of commerce.

ANOTHER HOAX IS EXPOSED

Napoleon, O., Sept. 12.—(UP.)—Coke was right—thinking—makes one ill or well.

In support of his doctrine many rheumatic folks about Ridgeville, O., will testify, after their experience with magic belts sold to them for \$20 to \$65.

All patients were rapidly improving until the hoax was exposed by one of the purchasers.

Henry Cammann made a down payment of \$20 on a \$65 belt. When the man and woman, posing as representatives of the Lutheran Seminary, Fort Wayne, failed to return for the remainder of the \$65, Cammann phoned to the Seminary.

The Seminary officials advised him they knew nothing of the magic "sure cure" belts and that he was apparently the victim of fakers.

The expose spread rapidly and the owners of the belts had their pains and aches return—goaded by the realization they had been "taken in."

County authorities are searching for the couple traveling in an auto. They sold a cheap variety of belts with a wire coil under the lining to give them a "magical" appearance.

BUYS A NEW NEWSPAPER

The following item, which was accompanied by a photograph of James G. May, son of Dr. and Mrs. John B. May, of New Holland, was taken from the latest issue of the Publishers' Auxiliary, a trade journal of the publishing profession:

"The New Concord Enterprise changed hands recently, James G. May taking charge of the publication, which is now in its forty-fourth year. 'Jimmie' May enters this new field ripe in experience and fully equipped to make the Enterprise live up to its name. A graduate in the class of 1913 of the school of journalism, University of Missouri, he was on the Cleveland Press for five years, later classified manager of the Akron Press, had connections of several years' standing with the Cleveland News, followed by two years of editing and managing the Weekly Transcript at Dresden. Mr. May is a member of the Delta Upsilon fraternity. With Mrs. May and the three children he has taken up permanent residence in New Concord. 'Jimmie' has three hobbies: His family, his newspaper work and to see some husky lad in mole-skins tearing off 100 yards for a touchdown."

OLD TIMERS' PICNIC

At the home of Mr. and Mrs. Charles L. Clifton, west of New Holland Friday, an old timers home-coming was held. Between forty and fifty were present and all enjoyed the occasion hugely; among those from out of the old home township present were Attorney and Mrs. Charles H. May and son David, of this city; Mr. and Mrs. John D. Fidler and daughter Miss Eleanor, St. Louis, Mo.; Mrs. Herbert Martin, Des Moines, Iowa; Mrs. Lena Robinson, Mrs. Elma Kouns, Mrs. John Durant and daughter of Washington C. H.; Mr. and Mrs. John H. Dunlap and son John, Williamsport; Misses Alma and Estella Grimes, Mr. and Mrs. Channing Vlerebome and daughter Elizabeth Ann, of this city.

Resolution Too Late

The resolution to avoid an evil is seldom framed till the evil is so far advanced as to make avoidance impossible.

True Progress

The only progress which is really effective depends not upon the bounty of nature but upon the energy of man. —Kurtz.

LIGHTING HINTS FOR CAR SAFETY

Laws Require Adjustment and Operation to Insure Protection on Roads.

(By S. J. Williams, Director Public Safety Division, National Safety Council.)

Laws in most states now require that 30 minutes after sunset until 30 minutes before sunrise no automobile shall be operated unless it has sufficient lights, so adjusted and operated as to make the highway safe for the public. Motor vehicle headlights should enable the driver to distinguish clearly a person, vehicle or obstruction at least 200 feet ahead. Dangerous glare or dazzle should be avoided.

Lights to Display.

Cars should display: (A) Two headlights when in motion, one on each side, both lights of equal power. Headlights should be white or tinted but never red. (B) Headlights or side parking light when motionless. Lights should be visible at a distance of at least 500 feet. (C) One tail-light, red, that is visible at a distance of at least 500 feet. Lights should be displayed whether car is in motion or standing. Tail-light should be at left or center of car and illuminate license number plate with a white light.

The Illuminating Engineering society, after considerable investigation and experimentation, has formulated a table of headlight intensities at different angles which has been widely circulated. If headlights conform to this table, all dangerous or dazzling glare will be eliminated. Many states now require headlights to conform to these specifications and most manufacturers are able to furnish such headlights. Some of the patented devices now on the market, however, do not necessarily make the headlight intensities conform to the standard. When purchasing such devices, buyers should ask for a guaranty. This guaranty should state the size of the lamp to be used, the tilt of the headlight, focal adjustment required and instructions how to get these adjustments.

A home-made arrangement can be devised to give satisfactory results if lens is properly covered, frosted or painted (not red). If light is at or back of focus, paint upper half of lens; if ahead of focus, light rays cross, so paint lower half of lens.

Sizes of Bulbs.

Different devices require different sizes of bulbs. Headlight bulbs in some states are not allowed to exceed a rating of 24 candle-power; in other states the maximum is 32 candle-power.

The bulb in some headlights can be moved slightly backward or forward by adjusting a small set-screw. To focus a bulb, allow light to shine on a wall 25 feet away. Move bulb backward or forward until the circle of light on wall is of smallest possible diameter. The majority of headlight devices call for this adjustment. A few call for an adjustment either behind or ahead of the focal center; correct adjustment for either position gives largest possible spot of light without a dark or shaded center.

Headlights should be tilted up or down as required by the different types of headlight devices. Car vibration easily changes the tilt and focal adjustments; frequent tests and readjustments are necessary.

Spotlight should be installed as high up on the car as practicable. It should be impossible to make the center of its beam of light strike the level highway more than 50 feet ahead of the car; except when swung 30 degrees to right or left of straight ahead position, then no limitation is placed on the height to which the beam may be raised. Size of lamp used in spotlight should not exceed a rating of 21 candle-power.

Always carry a spare bulb for your headlights, the same as you do a spare tire.

Headlight lens may loosen and rotate in the frame; inspect it frequently, adjust and tighten if necessary.

Reflectors need careful attention.

Knocks Indicate Trouble Somewhere in Engine

Ability to tell one knock from another forms an important part in the education of the motorist. They may be classified under the four general heads: Spark too far advanced, overheating, carbon in cylinder head, and loose or worn parts.

A spark knock occurs only when the engine is pulling against heavy load, as on a hill. If the knock disappears when the spark is retarded and comes on again when the spark is advanced, it is evident that excess carbon is the trouble.

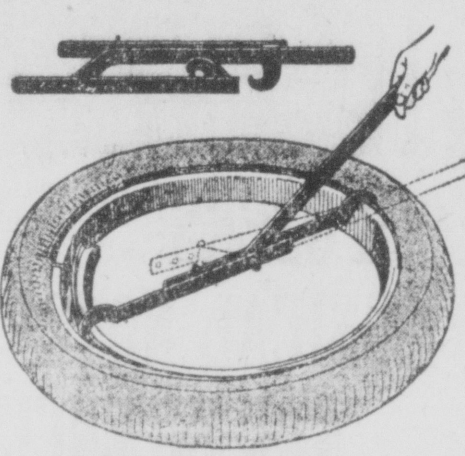

A knock due to overheating will also be noticed on a hill, but it occurs on level roads. As it is always accompanied by steam from the radiator, it is not difficult to identify.

Carbon knocks may be mistaken for a knock due to overheating, as it increases in loudness on a hill and has another symptom in common, that of causing the engine to run after the switch has been opened. To make sure of this trouble remove a spark plug or a valve cap and look into the cylinder. If the parts are slightly discolored there is nothing to fear, but if there is much carbon it will be obvious.

Having eliminated all three above, there remains the possibility of piston slap or of some bearing working loose. Piston slap occurs mostly in old engines and cannot be removed without regrounding cylinders and fitting new pistons and rings. This knock is not dangerous. But a part coming loose may wreck the engine, so do not experiment, but have an expert take up the search at this point.

Adjustable Rim Tool

A new tool for the removal of automobile tires consists of two adjustable bars connected with thumb screws to a handlebar, by which the tool is expanded or contracted when the rim is engaged by lug hooks at the outer

Contracting a Rim With a New Tool for Tire Removal: The Tool Is Adjustable to Any Size of Rim.

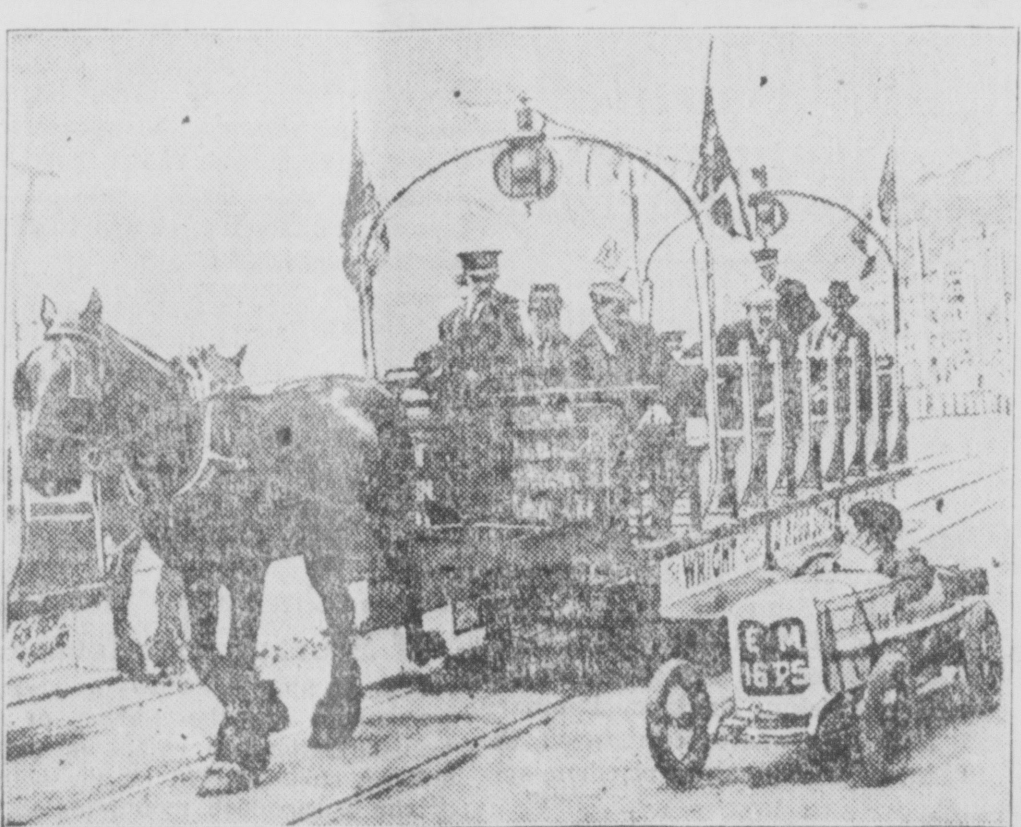

ends of the bars. The tool may be adjusted to various-sized rims by merely changing the thumb screws to different holes spaced along each bar. It is made to fit any one-piece split, demountable auto rim, and enables the tire to be removed without injury.—Popular Mechanics Magazine.

Worn Piston Rings Will Cause Overheated Motor

The average motorist, when he becomes aware of an overheated engine, usually thinks immediately of such common causes of motor heat as the lack of oil or water. There are, however, still other reasons that are just as potent and dangerous. One of these is the worn piston ring.

Automotive experts tell us that, on each compression stroke, part of the gas vapor passes down past the loose-fitting piston rings into the crank case and there condenses and mixes with the oil, thus causing a gradual thinning out of the lubricant. Consequently the rubbing steel parts are "starved" of oil, and friction at once begins. The mixture of oil and gas, the function of which is to form the film of oil between the cylinder walls and pistons, is soon broken down under the intense cylinder temperature. The gasoline immediately burns under high temperature, leaving a carbon deposit and leaving the rubbing surfaces hard and dry. This cannot help but create heat, which at once registers on the heat indicating device placed on the radiator cap, thereby warning the motorist to act before it is too late.

SMALLEST AUTOMOBILE EVER CONSTRUCTED

A miniature motor car which can travel at 45 miles per hour, has just been built by an English amateur enthusiast named Malins, who is shown in it. The engine, which is only 1½ horse power, is fitted at the rear. Photograph shows passengers on the antiquated horse tramcar at Douglas, Isle of Man, much amused at this example of modern conveyance.

A GOOD EXAMPLE

Two Washington fire guards were arrested for smoking and for leaving campfires burning in the forest they were "protecting." An Oregon man was fined \$100 for refusing to help put out a fire he had started, saying that he had lived there for 47 years and he "knew all about fires."

The Northwest has just gone through a bad fire season; it will take a lifetime to put many burned-over areas back to the condition they were in last spring. A law that punishes the careless, defiant or criminal user of our forests, is a good law that needs rigid enforcement.

Waistline Normal
Again in England

London Designers Have Restored Belt to Traditional Place.

Surprises are not common in the study of styles, but they do happen, says a fashion writer in the New York Times. All the while the fashion creators at Paris and their confreres on the other side of the water have been debating the return to the normal waistline one has only to set foot in London to find it has arrived. The question has remained for months a matter of conjecture; but British decisions are deliberate, and the belt is once again placed at the natural line. Prominent designers in London are not giving special emphasis to the fact, reluctant, perhaps, to take a too radical step before Paris has given her sanction.

To the English woman of fashion Paris is still the center of styles creation, however loyal she may be to her own country's ideals and productions. This year there has been a broadening of horizon, a more sympathetic feeling, largely the result of the Exposition des Art Decoratifs, beneficial to both London and Paris. This does not mean that English women accept unconditionally the decrees of Paris or any other authority. Individuality is still their precious possession, and an Englishwoman will wear what she chooses with the complacent assurance that it is she who is setting the style. At least it is the fashion as it should be, whether or not the rest of the world follows. This may, in a sense, account for the revival of the normal waistline. Leading London modistes do not admit wholly that the long waist and straight silhouette are passe, for they are still the lines upon which some of the handsomer models are built by both English and French creators.

Center of Fashion.

There is always a certain satisfaction in dealing with "headquarters," and in London one finds oneself at the very center of fashion in sports dress. We have long looked to England for authority in tailored clothes, in coats, in overgarments of different sorts. We have referred to fabrics as "English" material when a more specific name is lacking. London sports togs, famous the world over, are the joy of an American sportswoman's heart. They have simplicity and dignity through rapidly changing styles. Novelties may come and fads may go, but a mannish tailleur of Scotch tweed or Irish homespun has an honest-to-goodness look not to be ignored.

There are kashas and cloths of different weaves and weights, but the first thing the smart tailor offers you is a conventional two-piece suit of wool mixture, diagonal, or woven all in one color. In an unusually gay sports season fashionable women are wearing the simplest of these tailored suits, in the roughest finish materials, for golf and tennis, for motoring, hiking and shooting. The plain wrap-around or kilted skirt, with box coat,

Jumper Dress That Is Hit of London Season in Sports Wear.

tailors know better than any others how to introduce the tartans in women's dress. They do it with precision and decorative effect. It is acknowledged to be a sentimental tribute to that much-loved Scotswoman, the duchess of York, whose popularity appears to have done much to stimulate interest in the Scotch fabrics. The tartans are used in wools, in silk, for a kilted skirt, a hat; as a lining, trimming, sash.

A parasol covered with Scotch plaid taffeta carried with an all-white semi-sports dress at the Eton-Harrow cricket match was most effective. Another uncommon costume had a kilted skirt of a MacKenzie tartan with soft white peasant blouse and a bolero of black velvet.

The conspicuous success of the London season in fashions is the two-piece jumper dress. It is the final word in style, comfort and utility. As Reville, past master of the art of sports dress of the conventional and refined type, presents the jumper dress it is done in a fine quality of wool, silk and wool, all silk or cotton jersey or stockinette. It consists of a simple skirt plain or kilted, and an overblouse of the same material, made with high neck and long sleeves, and is in all ways like any overblouse or slip-on sweater as we know it. Beige, bois de rose, tan and yellow are the popular shades used, with very few dark colors offered.

A real achievement of Reville is one of these jumper frocks especially designed for tennis. The wrap-around skirt ingeniously conceals a pair of trousers of the same material, made all in one with the costume, yet with perfect convenience and grace. A sash of silk, knotted at one side, gives an artistic touch.

Another, in yellow-and-tan stockinette, has a short, straight skirt, with overblouse giving a tailored appearance, open at the neck, with small revers and a cravat tie, and a pocket on each side below the belt. Of the short sleeve or sleeveless middie there is not a trace, and all of the jumper suits have long sleeves with snug wrist-band. The kilted skirt to be worn with separate jumper or sweater is very popular and has the virtue of being youthful.

Home of the Knitted Dress.

London is the home of the knitted dress and its shops this year offer a large and attractive assortment of knitted frocks, jackets, sweaters, accessories and occasional garments of more or less formality. The best are, of course, hand made, intensely interesting as examples of knitting and crocheting in artistic and sometimes elaborate patterns. It is evident that a revival of this type of dress will boom the knitting industry and give opportunity to many handworkers. Plain patterns are usual, but some of the more elaborate things are done in clever reproductions of the old patterns of the days when knitting was considered a gentle accomplishment.

In one of the most expensive original designs, narrow panels imitating the plaits of a Norfolk jacket are knitted in, one with the whole fabric of the dress, an astonishing bit of needlecraft.

Frock That Is Done in Beige Jersey Cloth, With Attached Cape.

short or hip length, a plain polo shirt or overblouse is almost a uniform among English sportswomen. The coat has plenty of pockets. When a shirt is worn there is also a belt to define the normal waistline. In an outfit of this description a woman is comfortably and fully equipped for any country sports and has a look of correctness.

A variant of this regulation sports suit is a sweater or jumper instead of the coat. There are many kinds, colors and patterns of sweaters—some to match the skirt, some in gay, bizarre patterns and in endless unexpected combinations. The topcoat with this arrangement is longer and more voluminous.

One of the ultra-smart jackets offered by a well-known London designer is made of leather. It recalls the old-fashioned shooting jackets met used to wear but in its feminine version it is a trim and shapely affair.

A shooting costume from a London-Paris house of high standing has a kilted skirt of black-and-white kasha in a large block pattern. With this is the ordinary shirt of white silk broadcloth belted with black leather. The short, double-breasted coat is of black kid with four square pockets and wide revers, and is lined with the black-and-white cloth.

The Shepherd's Plaid.

An engaging little suit was made of woolen material in shepherd's plaid with jacket of bright red leather, lined with the plaid. Scotch plaids in the different tartans are seen a lot in the lining of these leather coats. One of black kid, made seven-eighths length, is stunning lined with a gay tartan. The fancy for leather is illustrated in leather trimmings, in bands and cut-out patterns to be applied as borders and plaques on cloth, as well as in the thousand and one fascinating accessories.

A picturesque model in a sports suit is that made of Scotch plaid. English

Birds Faster Than Trains

Wild birds are capable of attaining great speed in flight. There is on record a swallow that traveled at the rate of 100 miles an hour, and a homing pigeon commonly will go more than 60 miles an hour. It is said. Even a pelican has been known to make 50 miles an hour and a wild duck has been credited with 50 miles an hour.

Soil is the moth's delight; better have that coat or overcoat cleaned before packing. Get a moth proof bag free at

Most Common Diseases

According to figures calculated by a leading life insurance company, the seven most common causes of death of persons over ten years of age in the United States are as follows: Heart disease, which heads the list among both men and women. Second, chronic nephritis for men and cerebral hemorrhage for women. Third comes cerebral hemorrhage for men and cancer for women. Fourth among men is cancer and among women chronic nephritis. Tuberculosis is fifth among both men and women. Lobar and broncho pneumonia are sixth and seventh among both sexes.

WE SAVE YOU MONEY.

The time is passed when the measure of the value of a memorial is quantity. I hope the time has come when that measure is quality. I care not whether the material be marble or granite, its future will be measured by the character of the design. It is quality that has preserved for us the finest examples in painting and sculpture. It is quality that will stamp our imprint upon cemeteries of the future. Simplicity, correct lines and proportions and proper ornamentation are the real fundamentals. A design that is right, material that is lasting, and perfect workmanship, spells success for the future of this industry and the beautification of the cemetery. Will you let me help you select the memorial for your lot. Call at show room. NO AGENTS.

Honor for King George

The appointment of King George to the rank of admiral in the Swedish fleet is considered one of the greatest honors Sweden can bestow. Although King George is qualified to hold a high post in the British navy, when other rulers have bestowed honorary rank upon him the army has always been selected hitherto. His majesty is thus, like his uncle, the duke of Connaught, the colonel of a crack Spanish infantry regiment and is also a field marshal of Japan. Sweden has never indulged freely in granting honorary positions in her navy to foreign monarchs, which makes the courtesy extended to his majesty a still greater compliment.—Family Herald.

Sewing Machine Exhibit

Through the co-operation of sewing machine manufacturers, the textiles and clothing division of the bureau of home economics of the Department of Agriculture has arranged for a permanent loan exhibit of the various types of home sewing machines now on the market. Forty-three machines are on display at present, including hand, foot and motor-driven models of all the types now purchasable. This exhibit, which is in the bureau of home economics building at Washington, gives the general public its first opportunity to study the various makes and models in one collection.

Lack of Tourists

Arouses the Irish

Dublin.—At the Rotary club in Dublin complaint was made that the tourist traffic, particularly from America, had not reached expectations this year.

One member who had returned from America said he was humiliated there by the questions asked regarding Ireland, by the doubts expressed as to whether the country was safe for travelers, and by the impression that Ireland was in a backward state of civilization, "with pigs in the drawing room."

P. J. O'Brien, secretary of the Irish Tourist Development association, answering these statements, said that, while there had not been anything in the nature of an American invasion, the arrivals at Cobh totaled more than 1,000 a week, and the traffic between Ireland and England on one of the most important services was practically double what it was last year.

The transportation companies concerned were satisfied with both results and prospects.

In Ulster, the tourist traffic is reported in excess of previous years and in several districts has reached the pre-war standard.

PHOTOGRAPH AN
UNEXPLORED LANDCapt. Stevens Takes First
Aerial Pictures of River
in Brazil.

New York.—Capt. A. W. Stevens, aerial photographer of Dr. A. Hamilton Rice's expedition to hitherto unexplored regions in the tropical jungle north of the Amazon river basin in Brazil, announced recently that he and Walter Hinton, the aviator, according to the New York Times recently, had discovered the source of the Parima river in the Parima mountains last month, and had photographed and mapped almost 1,000 miles of terrain, including 120 miles never before explored by white men.

Flying at an altitude of one mile above the Rio Branco, the Rio Uraricoera and the Rio Parima, and using a special high-altitude camera that can make a photographic record of a strip of land 120 miles long and one and one-half miles wide, Captain Stevens said he had taken the first aerial pictures ever made of these rivers and the surrounding country, and had made the first complete and accurate map of the country all the way from the City of Manaus, the base of the expedition, to the source of the Parima river.

Accompanied by James W. Swanson, radio expert of the Rice expedition, Captain Stevens arrived in New York on the steamship Polycarp. Captain Stevens told of his experiences in the office of the Fairchild Aerial Camera corporation, which makes the special army air-service camera which Captain Stevens used.

Left the Expedition Behind.
Captain Stevens said that he had left Hinton at Manaus and the rest of the expedition of 50 whites and natives, headed by Doctor Rice, several hundred miles farther from civilization on their way to the source of the Parima.

When the Rice expedition reaches the headwaters of the Parima, which it may have done by now, Captain Stevens went on, it may be confronted by the same tribe of cannibalistic Indians that attacked Doctor Rice and his party with poisoned arrows on the other side of the Parima mountains in 1920, and prevented the explorer's finding the source of the Orinoco river, which also rises in the Sierra Parima. It is hoped, however, that by this time the Indians, in the fashion of the Persian tribes in "Grass," may have made their annual pilgrimage across the mountains to the Orinoco side. Stevens and Hinton did not see the Indians at the source of the Parima, but did see clearings and other indications that one of their villages was near. In order to win their friendship for the other white men of the expedition, the aviators dropped red parachutes containing glass beads, pocket knives and other gifts.

Before his return to America Doctor Rice will complete his research at the source of the Parima into the ethnological and geological features of the hitherto unexplored region and its commercial possibilities. Captain Stevens said that the expedition already has learned many interesting facts about the customs of the friendly natives—full-blooded Indians who go about naked, eat raw food and are strict monogamists—and about fossilized skeletons discovered in the river basins.

Has Many Natural Resources.
When Doctor Rice returns, according to Captain Stevens, he expects to bring with him valuable information as to the possibilities of further development of the Amazon-Parima region for the sake of its rubber, gutta percha and other natural resources.

"The expedition has already shown," Captain Stevens went on, "that a white man can stand the same exposure in the tropics as the Indians when proper medical precautions are taken. Charles Bull, a former Harvard athlete and a classmate of Doctor Rice, traveled alone, except for an Indian crew, in a canoe ahead of the main body of the expedition for 700 miles. Naked as the Indians himself, he got to be nearly the same color as they, but at last reports he was standing the exposure to the tropical sun and rain in fine shape.

"Almost all the members of the expedition had tropical fever. All recovered except Doctor Koch-Grunberg, the German explorer, who died. Hinton suffered from the ordinary type of malaria, which is chronic and which bothered him all the time he was flying.

"Great credit is due to Hinton for piloting our seaplane in and out of many difficult situations during the 174 hours we were in the air between Manaus and the headwaters of the Parima, especially in view of his recurrent attacks of fever. We had to fly at more than 5,000 feet because of the heat.

Used Plane for Scouting.
"We used the plane as scout for the main expedition, sketching in the main streams and many tributaries, and for photography. The plane was of American make and stood nine months' constant exposure to tropical sun without shelter, and with the hull immersed in water a great part of the time.

"Bull followed us to establish gasoline stations. After making and photographing a certain stretch of river we would fly back with the pictures, which would be developed in order to guide Doctor Rice over that part of his journey."

Captain Stevens said he thought the

outstanding feature of the expedition was its success in wireless transmission from the jungle.

"Although working with portable apparatus and in the heart of the world's greatest forest," he said, "a record was made in exchanging the first wireless messages to pass directly from South America to England and back again. Long-wave communication was carried on between the expedition and Manaus and short-wave communication to many parts of the world, including New York, San Francisco, London, Rio Janeiro and New Zealand. The signals were reported as very strong, both in New York and London. Part of the apparatus was designed and assembled on the job by the operators, John W. Swanson and Thomas M. McCaleb.

"The antenna system was often erected by sawing down a number of large trees in the forest and stringing the wires between other tall trees on the edges of the roughly cleared space. A wire was usually strung from the folding table that held the instruments to a ground loop.

Curiosity Kills Cobra.

"On one occasion at night in the forest McCaleb, while transmitting, was startled to see a small cobra of a very poisonous species come crawling up this wire, attracted by the hum of the converter perhaps or by a small electric light. He waited until the snake pushed its head on the table and severed its neck with his pocket knife. Needless to say, the message suffered a marked interruption! Snakes were often seen in making camp, but always they moved away from men. A number of very large snakes were shot. It was almost unnecessary to take aim; the snake usually kept his head directly in front of the muzzle.

"The rivers were full of large fish, easily hooked or speared. A very common fish, the uariyha, though usually not over a foot long, has teeth so sharp and jaws so powerful that it often severed three or four strands of copper wire with which each hook was attached to lines. Because of this fish swimming was not popular.

"The largest animal that furnished fresh meat was the danta or tapir, some of which were shot for food. Wild pigs, monkeys and smaller animals were fairly easy to get.

"The real owners of the Amazon basin," he continued, "are the ants—big, little, black, red, with stings and with wings. Weight or bulk considered, certain small stinging ants, though not dangerous, can produce more irritation than almost any other carrier of venom, while the bite of the larger ants is far more dreaded than that of the scorpion. Scorpions were plentiful, and many members of the expedition were stung by them but with little harmful effect. From getting several thousand assorted bites and stings and being frequently in warm river water one's blood suffers some change, so that it is necessary to watch stings, scratches or cuts carefully to prevent tropical ulcer. Almost all natives bear the marks of these ulcers."

A custom of the country, Captain Stevens said, was to tie boys of fourteen to fifteen into a sack filled with stinging ants. Those who survived this test are recognized as having arrived at manhood's estate.

Captain Stevens said that the expedition lived largely on the native farina, or meal, and dried meats.

For Thanksgiving dinner Stevens and Hinton flew back down the Rio Branco to a settlement where they could get bacon and cheese, which had to substitute for turkey and cranberry sauce.

The Rice expedition left New York last March and went by steamer to Manaus, which is on the Rio Negro just north of its confluence with the Amazon. Two seaplanes which had been shipped from New York were assembled at Manaus in June.

The explorers followed the Negro to its confluence with the Branco, which they then followed until it ran into the Uraricoera. This they followed to its junction with the Parima, and this junction was as far as white men had previously gone. It was at the junction that Stevens and Hinton saw the last of the natives. For the 120 miles of unexplored land over which they next flew they saw no signs of life until they came to the clearings at the end.

Doctor Rice and his followers probably will have had some difficulty traveling over this 120-mile stretch, said Stevens, because of rapids and waterfalls. It will probably take the expedition weeks to cover the ground that he and Hinton flew over in a few hours, he added.

Captain Stevens said he and Hinton discovered the source of the Parima about 3 degrees north of the equator and 64 degrees west longitude, on March 9. This ended the aviators' work and they flew back to Manaus, where Hinton remained to take the planes apart and ship them back to New York.

Captain Stevens said that Doctor Rice will return to civilization early this summer unless he delays to investigate a recently discovered landslide, on another tributary of the Amazon, which has uncovered large fossilized skeletons.

Vandals Push Down

Tombstones in Cemetery

Kasota, Minn.—Twenty-eight monuments in the Kasota cemetery were pushed down during the night. Many of the stones are broken in several parts, entailing losses aggregating several thousands of dollars. A Bertillon expert has been dispatched by the Minneapolis police department to this city to take finger prints on the stones in an effort to trace the persons responsible for the destruction.

Withering Comment on

Result of World War

The Recorder sat in a tower on the wall of the Eternal city and thumbed an ancient book. The book contained the record of man's achievements.

The entries were surprisingly few. On the first yellow page were two words: "Fire discovered." The second entry, obviously made many centuries later, was equally terse: "The wheel discovered." It was evident that the Recorder took no notice of trifles and made entries only on those rare occasions when men took a step forward.

There was a brief note concerning the beginning of organized government, when men sacrificed personal liberty to win safety, and another to mark the beginning of democracy.

The discovery of printing received three lines.

The Recorder thumbed the pages of his book and yawned. And even as he yawned there was a great stir on the earth below and a war was in progress.

Nations girded themselves for the conflict and young men marched in

countless millions. Guns bellowed, gases crept along the ground, mighty ships were shattered. Orators denounced the evil that had been let loose in the world; idealists pictured a world free from human nature; valiant men died without whimper because their cause seemed just. Cities were destroyed; children starved; fields lay idle.

And when the orgy of killing was over, men gathered up the shattered remains of the civilization they had been so long in building, taxed themselves to pay for their follies and wrote their memoirs.

The world was dotted with new graves; new prejudices formed. The maimed hobbled on every street.

The Recorder, leaning on a window sill, had watched the commotion with some show of eagerness. Apparently he had hopes.

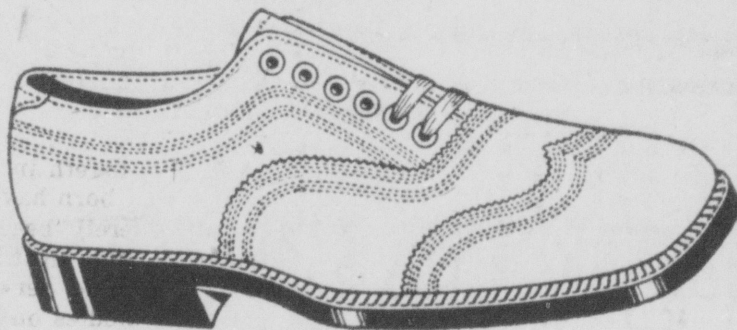

But when the world had returned to its accustomed way he yawned and closed his book.

A messenger appeared at the door with a question.

"Tell him," said the Recorder, "that nothing has happened."—Baltimore Sun.

Well to Inculcate

Pride in Ancestry

It is urged in defense of the lowly and in disparagement of the well born that a man cannot select his ancestors, but as a matter of fact a man frequently does.

Take the case of the man whose great-great-grandfather was a noted general. This man had two grandfathers, four great-grandfathers, eight great-great-grandfathers and 16 great-great-great-grandfathers, of whom the general was one. Each of the 16 had a wife, so that the man's cosmos contains but one thirty-second part of the general. When blood gets so thin it leaves little trace, and yet this man selects the general as his ancestor and says nothing of the others.

The reason is obvious. The others were nobodies. We have, then, a man who is one part general and 31 parts nobody; and yet in many ways he seems to be the general come to life again. He has the general's pride and manners and love of decency.

At first glance this seems a puzzle, but the solution is simple.

The general, being the one ancestor that family pride cares to remember, has been talked about and presented to children as a model for many generations. The gentleman is like the general because the general was used as a pattern in shaping his life.

The general's pride that he seems to inherit is not an inheritance. It is a homegrown pride, based on the fact of the general. The man says to himself: "I am descended from a general; that's who I am." Wherefore he carries his head high and looks the world in the face. But if there was no blood connection, and the man merely thought there was, his pride would be no less.

Which brings us at last to the point: "As a man thinketh in his heart, so is he." The well born have a tremendous advantage merely because they have something to live up to. And parents render a genuine service when they forget the nobodies on the family tree and preserve the few somebodies to inspire the kids. An ancestor is worth while if he can stiffen the backbone of a modern who might not be worth a whoop without family pride to keep him decent and set him a mark.—Baltimore Sun.

Fast Travel to India

All-steel airplanes now under construction in London will make the trip from England to India, roughly 8,000 miles as the crow would fly, if he were able to accomplish it, in three days and some odd hours, according to recent announcement of the British air ministry under whose supervision the machines are being built. The specifications provide that the planes be equipped with three motors developing 2,000 horse power, and it is hoped they will be able to accomplish 100 miles an hour and possibly even a greater speed. A crew of four or five will operate each machine, which will carry 20 to 25 passengers. It is proposed that these giants of the air travel day and night, there being sleeping accommodations, and hot meals by means of an electric cooker.

Praises American Charity

The adoption of modern farm machinery in Mesopotamian wheat fields, where sickles and flails were in vogue only a year ago, is only one of many evidences of the Americanization of Bible lands, according to Dr. Isaac Yonan, a native Assyrian who won the title of the "Hoover of Persia" for his food economy campaign in that country during the armistice period.

Doctor Yonan, in a report to the International Near East association, says that American agricultural methods as taught in the farm schools of the Near East relief during the past few years have begun to show results all over Armenia, Greece and Syria. "American charity has been a social and educational force of tremendous power in these countries," he declares.

Unsolved Mystery

"As I was coming back from Chick-atany," in the crossroads store related Gap Johnson of Rumpus Ridge, I saw an old feller with a gun across his lap setting on a specially big post in a wire fence. When I came along he just looked me over like a body does a shoot he aims to buy, and then without saying anything he glanced away and along the road I'd just come over."

"What was his notion in acting that a-way?" asked the proprietor of the emporium.

"I hain't the least idy in the world. He didn't 'pear to be the kind of a gent that I wanted to pry into his business."—Kansas City Star.

Electricity and Growth

Tests with 1,000-watt electric lamps at the Cambridge (Mass.) Electric Light company have shown astonishing results in the growth of grass by artificial light, says the Popular Science Monthly. Dr. Andreas F. Christian of Boston claims that bald heads may be covered, beards coaxed on clean-shaven faces, and bobbed hair grown long in a short time, by use of strong artificial light. The only requisite in the cases of both lawns and heads, he says, is that the germ of life must exist.

American Woman Honored

Mrs. Helen S. Wright of Pittsfield, Mass., has been elected a fellow in the Royal Geographic society of London, an honor regarded as the highest in its field, in recognition of her writings and research on Arctic and Antarctic exploration and history.

BLAMES CUSTER FOR MASSACRE

Veteran of Little Big Horn Declares General Disobeyed Orders.

Spokane, Wash.—Nick Imo, a veteran of the battle of Little Big Horn, June 25, 1876, holds that the massacre of Custer's command by Sioux Indians was due to disobedience of orders and "poor judgment" on the part of General Custer and not to the failure of General Reno to reach him in time with reinforcements. Mr. Imo, who served eight years in the United States army, is now seventy-six, and a resident of this city.

"Reno has been blamed for being lax, cowardly, dilatory and everything else," Mr. Imo said, "but it was impossible for Reno to reach the scene of conflict in time to participate. Custer himself was breaking an understanding that the pitched battle was to be June 26. He fought it a day earlier, before either the detachment of troops under Reno or Colonel Gibbons could come up, and lost."

Met Custer at River.

"I remember that we met Custer June 22, 1876, on the Yellowstone river, opposite the mouth of the Rosebud. We had just come from Fort Ellis and were camped on the north side when Custer, riding from Fort Lincoln, showed up on the south. That same day he received orders from General Terry to proceed up the Rosebud toward the Indian camp. The orders specified that the final engagement was to take place June 26, when all forces would concentrate on the camp."

"My detachment, under Colonel Gibbons, crossed the Yellowstone below the mouth of the Big Horn, June 24, and camped on the east side of the Big Horn. L troop, under Captain Tyler, which was in advance of Gibbons' command, was fired upon by the redskins, and returned to report. We camped on the Little Big Horn, June 25, just ten miles from the Indian camp, all ready for the battle, scheduled for June 26."

"My troop, under Capt. Edward Ball, was sent on in advance next day, with Captain Tyler on the right and Lieutenant Bradley on the left. To Bradley goes the distinction of first discovering the bodies of Custer and his slaughtered troops."

Indians Took Uniforms.

"I reconnoitered with Captain Ball and Bugler Kerney, about fifty yards in advance of the troop, and we came on twenty-four ponies and seven dead Indians, scattered about a couple of tepees. We also encountered a scouting party from Major Reno's detachment, out looking for Custer's band, and sent them on to Gibbons' camp to report our find. We returned to camp after a ten-mile scouting trip."

"There we learned of Custer's death. Immediately after that the hills around seemed covered with detachments of United States soldiers, marching in curious disarray. It was the Indians, wearing uniforms stolen from the bodies of their victims."

Women Give Girl Coat of Paint and Feathers

Shreveport, La.—Reports reached here recently of an attack by a mob of infuriated women on Miss May Simms, in the yard of a lumber company mill at Eros, Jackson parish. The woman was stripped of most of her clothing in the presence of 150 or more persons, a coat of paint and feathers applied, and she was warned to leave town, the report states.

This is the second reported attack on Miss Simms within two weeks, the first having occurred when she was chased into the swamps near the mill and warned not to return to the camp. Women who participated in the affair charged her with improper relations with men employed at the mill, it was said.

Town Marshall Davis of Eros stated he had received reports of the attack, but that no charges have been filed. No information concerning the present whereabouts of the victim could be obtained.

Old Cannon, Gold, Rum, Ship Dug Up in New York

New York.—Two ancient Dutch ships, rum bottles, coins, including a piece of eight bearing the date 1761 and a three-foot culverin with 17 cannonballs have been unearthed in the excavations for the new Seamen's church institute on South street along the lower East river front.

A forty-foot oak-built sloop held together by wooden pegs was uncovered recently. It was so rotted that it broke up quickly. A similar ship was accidentally demolished before workmen were aware that they were digging in a treasure trove of old New York.

The rum bottles are of fine old Dutch glass. The cannon has a bell muzzle with a two and a half inch bore. Other finds include powder horns, anchors, pigs of iron casting bearing date of 1757, and olive jars. The curios will be housed in the new institute.

Unique Violin

Midland, Md.—John Shields, known as "the greatest whittler in western Maryland," has just added to his large collection of curios a violin of standard size, made of matches. He was more than a year completing this rare instrument.

SOCIAL CALENDAR

The second annual reunion of the Barthelmas-Wardell families was held at the home of Mr. and Mrs. John Barthelmas, east of Circleville, on Sunday, September 6. The forenoon was spent in music and games. At noon one hundred and twenty-three guests partook of the sumptuous food which had been prepared.

After dinner the following program was given:

Music—Orchestra — White's Melody Lads

Vocal Duet Vera

Walters and Mildred Barthelmas

Music Orchestra

Vocal Solo Mrs. George Himrod

Music Orchestra

Following the program the business meeting was held. The officers for 1926 are: President, Bertha Krimmel, vice president, Edna Wardell; secretary, Kathryn Barthelmas; treasurer, Edward Wardell.

Business committee—Thomas Wardell, George Wardell and Charles Krimmel.

The families enjoyed very much the music furnished by the orchestra known as White's Melody Lads, of Columbus. This orchestra is a very good one. Miss Kathryn Barthelmas, daughter of Mr. Frank Barthelmas, is a member of the orchestra and it was thru her efforts that the guests were entertained with such good music.

The host and hostess were thanked for their kind hospitality. The guests departed in the evening hoping to meet again on the first Sunday of September, 1926, at the home of Mr. and Mrs. Thomas Wardell.

Miss Dorothy Willis, daughter of Mrs. LeRoy Willis, of Delaware, Ohio, and Mr. George Blodgett Rector, of Williamsport, were married at 6 o'clock Saturday evening, September 12, at the home of Mr. and Mrs. R. K. Willis 112 North Washington street, Delaware.

The home was beautifully decorated with smilax vines, Jacques roses and wine colored carnations, fraternity and sorority flowers and was illuminated with a magnificent array of candles set in elaborate candelabras. Fraternity and sorority colors, wine, silver blue, red and green, were profusely used in floral and lighting decorations.

A musical program was given before the ceremony by Miss Martha Rukensbrod, of East Palestine, Ohio. While the wedding march was played by Miss Rukensbrod, the ushers, Mr. James M. Smith, of Williamsport and Mr. Rufus Short, of Columbus, preceded the wedding party, forming an aisle with silver blue ribbon and escorting the groom and best man, Mr. Nelson Vigor, of Marion, to the altar.

The bridesmaids, Miss Gwendolyn Rector, of Williamsport, and Miss Grace Hooper, of Akron, followed by the maid of honor, Miss Margaret Taggart, of Delaware, escorted the beautiful bride to the altar, accompanied by her grandfather, Mr. R. K. Willis, who gave her away. The aisle was strewn with flowers by little Miss Arvonja Watkins. The impressive ring ceremony was read by Rev. Thomas F. Watkins, pastor of the Presbyterian church, Delaware. The bride was gown in white georgette with panels of chantilly lace. The maid of honor wore rose georgette. Miss Rector was gown in ceylan georgette and Miss Hooper in a pastel shade of yellow georgette.

After the ceremony a dinner was served. Seated at the bride's table with the wedding party were Mr. R. K. Willis and Mrs. LeRoy Willis, Mr. and Mrs. Edward C. Rector, Rev. and Mrs. Thomas F. Watkins, Mr. and Mrs. Joy Crum, Dayton, cousins of the bride, who had been married earlier in the day at Dayton.

Other out of town guests present were Mr. and Mrs. Dwight Rector, of Circleville; Mrs. Belle T. Rector and Robert Rector of Williamsport; Mr. and Mrs. C. D. Lehman, of Worthington; Mr. and Mrs. William Oldham Columbus; Mr. and Mrs. Ira Metzger Frankfort; Mrs. Barbara Stout, Miss Mary Stout, Columbus; Miss Josephine Saylor, Tiffin; Miss Evelyn Low, Pittsburgh, Pennsylvania; Miss Eleanor Jones, Washington C. H.; Mr. James Bruce and Richard Anderson, Portsmouth; Mr. Roy Ernest, Cochoston; Mr. Charles E. Bodurtha, New York City.

Mr. Rector is a son of Mr. and Mrs. Edward C. Rector, of Williamsport, a graduate of Williamsport high school and formerly a student at Ohio Wesleyan university. For the past three years he has been a state examiner from the office of State Auditor Tracey. He is a member of Phi Kappa Psi fraternity.

Mrs. Rector is a daughter of Mr. and Mrs. LeRoy Willis, formerly of Lewis Center, Ohio. Mr. Willis died two years ago in Delaware. She is a graduate of Delaware high school and Ohio Wesleyan university and for the past two years she has been an instructor in the Delaware high school. She is a member of Sigma Delta Pi, a local sorority, whose charter in Phi Beta Phi is to be installed in October. She is also a member of Phi Beta Kappa Scholarship fraternity.

After October 1, Mr. and Mrs. Rector will be at home at 170 North Franklin street, Delaware, Ohio.

John Alden Home Rich in Historic Interest

New England is still rich in the old landmarks and homes of pioneer settlers. One does not have to go far from New York to come across these ancient monuments and habitations. Situated close to the South Shore tracks and a short walk from the Duxbury station stands the house that was the home of the girl for whom the big Fall river steamer Priscilla was named and of her husband, John Alden.

"Leaving the Duxbury station going toward Plymouth," says the New York Times, "The house is on the left-hand side of the train and can be plainly seen from the car windows. It is undoubtedly one of the most historic houses in America. While it is very properly called the John Alden house, it was actually built by his son, Jonathan Alden, in 1653."

"The old house is well worth a visit. Entering at the front door, the 'great room' is on the right and the parlor on the left. The great room and, in fact, all the rooms are filled with fine and rare old-fashioned furniture. Across the ceiling of the great room can be seen the immense beams used in the construction of early colonial houses and the wrought-iron 'H' hinges to the closet doors. In the great room also are two rare engravings by John Jones, London, valued at \$500 each."

"There is also a punchbowl 225 years old, some rare and beautiful glassware and some Lowestoft ware, including a rare helmet pitcher; a beautiful secretary with a secret drawer also adorns this room, as well as a small table actually used by John Alden and Priscilla. In the kitchen is the huge open fireplace with a capacity for four-foot logs; also a brick oven and the usual assortment of utensils in connection therewith; sets of wooden and pewter ware and much rare china. Off the kitchen is a small room in which both John Alden and Priscilla died."

The Material

"I am naturally romantic. Yet all my life I have had to think of the material, always the material."

"How is that, madam?"

"I'm a dressmaker."—Louisville Courier-Journal.

At It Long Enough

Dauber (showing pictures)—Don't you think it is about time I exhibited something?

Candid Friend—Yes, a little talent.

AMUSEMENTS

The frenzied search of a debutante flapper for a new thrill and the adventures, dramatic and comical, which befall her, is the basis of Robert G. Vignola's Metro-Goldwyn-Mayer production, "The Way of a Girl" which comes to the Met theater today.

The story is adapted from the novel "The Summons," by Katherine Newlin Burt, and has been told by its director and the players so as to feature the humorous side.

Eleanor Boardman, who has appeared lately in "Wife of the Centaur," "So This is Marriage" and "Sinners in Silk," plays the leading role, her first attempt at light comedy on the screen.

She is supported by Matt Moore, as her conservative suitor, William Russell in an unusual good-bad man role, and Mathew Betz, the latter a new addition to screen villainy.

The central character of the story races from prize fights to jails, to artists' balls and fast automobiles for her desired thrills, and the dramatic climax of the story provides her more of a thrill than she had sought.

Part of the white man's burden consists in acting white while dealing with the yellows.

Use Soy Bean Oil Meal for Poultry**New Feed Could Well Be Fed to Greater Extent Than at Present.**

(Prepared by the United States Department of Agriculture.)

With the rapid expansion of soy-bean culture in the Corn Belt states farmers of that region have at their disposal a new poultry feed which could well be used to much greater extent than is being done at present, says the United States Department of Agriculture. Poultrymen in the Pacific Coast states have used soy-bean oil meal for several years and consider it a most excellent feed for growth and egg production.

Feed Value of Meal.

A number of feeding tests at various experiment stations have shown the value of soy-bean oil meal as a poultry feed. At the North Carolina station it was found that when fed in equal quantities with wheat shorts and cracked corn mixed with sweet milk soy-bean oil meal proved to be a most valuable feed and one to be recommended as a good ration for feeding to little chicks. One lot of chicks on soy-bean oil meal averaged 1.4 pounds when eight weeks old. From these tests it was concluded that the soy-bean oil meal could replace rolled oats in chick feeding.

Another series of experiments showed that soy-bean oil meal with a suitable mineral mixture is a better supplement to corn meal than meat scraps and is nearly as good as condensed buttermilk when fed to chickens for short-time intensive-feeding periods. A simple mineral mixture composed of bone ash, limestone and salt was used. To be most effective, the amount of mineral mixture to be added should be about 2 per cent of the ration.

Add Mineral Mixtures.

The addition of the mineral mixture is necessary to prevent too great a growth of fat at the expense of protein growth. Hens responded in these tests to the use of the mineral mixture in a similar manner to that of young, growing birds. The mineral mixture, it has been shown, increases the value of the soy-bean oil meal as a protein supplement for growth and egg production more than 40 per cent. A good mineral mixture is made of 60 parts bone phosphate, 20 parts salt, and 20 parts of limestone.

Vaccinate to Prevent Hog Cholera Outbreak

Warnings against a possible serious outbreak of hog cholera this year were given out recently from three states. With the hog market definitely pointed in the direction of profits, this seems like a poor time to take chances on losing the hog crop to save a few dollars.

F. A. Zimmer, state veterinarian of Ohio, points to the fact that hog cholera runs in cycles and that it is due this year. About the time the hog raiser concluded in other years that the disease was disappearing, it has reappeared in acute form to take a toll of millions of dollars.

Dr. R. A. Craig of the veterinary department at the Indiana Agricultural college believes that a large corn crop and a good price for hogs will bring about a heavy movement of feeder hogs and cholera infection will become widely scattered. Furthermore, because of low prices, few hogs were immunized during the past two years, thus adding to the amount of material for cholera to work upon. Threshing gangs and visitors during the fall are largely responsible for spreading the disease from local areas because people do not practice what they know about the control of infectious diseases.

Vaccination is now generally recognized as the reliable method of preventing cholera when properly administered. While hundreds of farmers are vaccinating their own hogs successfully, there are many advantages in employing a skilled, established veterinarian who is known to be reliable and who will do his work for a reasonable price. At any rate, avoid the drifter who offers to do the job cheaply, but seldom is ever heard from again.

Silage and Fodder Made by Stacking Green Corn

Another form of silage may be made by stacking the bundles of green corn which have been cut about 20 feet in diameter and 20 feet high. The bundles should be distributed evenly over the surface with the butts laid to the outside. This will keep the outside higher than the center so that it will be necessary to fill in the center before the stack is completed. Thorough tramping will be beneficial. About eight inches around the outside of the stack will spoil but as only the butts of the stalks are affected by this, the loss is not serious. The top of the stack should be kept covered with a foot or two of straw or hay during the winter to reduce spoilage.

According to the Minnesota experimental station, stack silage cures somewhat differently from ordinary silage and has a sweet molasses odor and flavor which makes it palatable to all kinds of live stock. The results obtained with stack silage, however, have not always been satisfactory. The method is only suggested here as a possibility. Under many, if not most, conditions it would seem that handling the immature corn as fodder would be safer.

New Railroad Connects South American Countries

Washington.—Recent completion of a 124-mile railroad line connecting Bolivia and Argentina was hailed in a statement by the National Geographic society as bringing "the long-cherished dream of uniting the republics of North and South America with bonds of steel another step nearer realization."

In addition to providing a new outlet for Bolivia, which has no sea-coast, the new line connects with the railway systems of Argentina at its southern terminal and through them, with the lines of Uruguay and Brazil, while at Atocha it is possible to make connections with Pacific coast ports and to continue as far north as Cuzco, Peru.

"More than half of the 10,211 miles separating Washington and Buenos Aires have already been paved with steel," the statement said.

Tree Preservatives Kill Bees

Werder, Germany.—Millions of bees in the Werder district have been killed supposedly from chemicals sprinkled upon fruit trees. Only the insects that were near the orchards died.

**A System of Farming That Brings Health and Prosperity**

Every farm, regardless of the method of farming practiced or of the crops raised, should have at least a few good milch cows to provide

- (1) Enough milk, cream and butter for home use;
- (2) Enough skim-milk to raise some calves, pigs and chickens;
- (3) Enough cream or butter to sell to pay, in part or entirely, current living expenses.

This plan has been a "life-saver" for thousands of farmers, especially during the hard times of the past two years. It insures a living, at least, and often other income besides.

Such a plan pays best with a De Laval Cream Separator. It soon pays for itself—and skims cleaner, lasts longer and is easier to operate and clean than any other.

Longevity is largely a matter of selecting a spouse who isn’t jealous. Birmingham News.

SHORT STORIES OF THE BUCKEYE STATE

An Inaugural Bail 51 Years Ago.

G. A. Halm, 397½ South High street, has preserved a copy of the program of the inaugural ball given at the city hall on the evening of Jan. 12, 1874, the governor inaugurated that day being William Allen. The managers were John G. Thompson, A. J. Mack, Samuel Thompson, E. T. Hall, John G. Reinhard, James Naughton, Richard Nevin, Samuel Shaffer, James W. Newman, Frank H. Hurd, James T. Irvine, Sam F. Hunt, John A. Cockerill, John H. Putnam, R. C. McCloud, W. W. Armstrong, A. T. Walling, N. Schleich, William Bell, Jr., John G. Doren, S. K. Donavin.

Col. J. O’B. Renick was chairman of the floor committee and had the following three-section committee under him: To serve from 9 to 11, W. B. Hayden, A. Mayo, R. H. Koehler, G. F. O’Harra, R. E. Reese, W. W. Medary, Frank Huntington, J. H. Outhwaite, Allen T. Brinsmade, J. C. Lough, Henry Heinmiller, W. D. Hill, Wm. E. Horn, J. McLean Smith, Amos Eberly and H. T. Van Fleet. From 11 to 1 a. m., I. B. Potts, E. F. Poppleton, A. D. Heffner, Waldemar Otis, George Cole, Charles Mumaugh, Dennis Kelly, Glenn Taylor, W. B. Dodds, Jr., J. C. Donaldson, William L. Brown, William H. Paul, J. S. Nelson, George J. Lang, Dr. Thomas Patton and Samuel Bradford. From 1 to 3 a. m., J. H. Cushing, A. J. Beach, George K. Nash, John W. Morris, Dr. Thomas R. Sparrow, George W. Bachman, Henry Gundersheimer, James Finnigan, Adolph Theobald, Charles F. Krimmel, E. S. Wallace, Frank W. Merrick, Edward Keefe, J. E. Parsons and S. M. Smith. It will be noted that they made a night of it.

On the dance program were waltzes, schottisches, gallops, polkas, quadrilles and lancers. The overture was an inauguration march, “Rise Up, William Allen,” composed for the occasion by Hermann Eckhardt. The only name of a person still living in the above long list is that of Henry Heinmiller.

Mr. Halm’s program still bears the names of Miss Smith, Miss Bortle, Miss Arms, Mrs. Shaffer, Miss Hoster, Miss Gibson, Mrs. Nevin, Miss Beck, Miss Jones, Miss McDonald, Miss Moore and Miss Adams written upon it, but he admitted that after the passage of 51 years his memory is not clear as to just who these dance partners of his were on the noted occasion. What dignified matron of today recognizes herself in these entries?—J. H. Galbraith in Columbus Dispatch.

EFFICIENCY MEETING

Bluefield, W. Va., Sept. 10.—Efficient railroad service and the part that the railroad employee plays in rendering such service held the attention of more than 300 Norfolk & Western Railway Company officers and employees assembled in the City Auditorium here today. In addition approximately 100 shippers and civic representatives were present as the railroad’s guests. The meeting is the sixth of the road’s Annual System Efficiency Meetings and brings together Norfolk & Western employees from every department and every part of the line from Norfolk to Cincinnati and Columbus.

Among those attending this year’s meeting was H. L. Bartholomew, yard clerk, this city.

Toad’s Great Value

Some form of toad can be found in each state. Toads were formerly more numerous. They are now becoming rare, for they are destroyed by all classes of vertebrates and by drought in summer and severe cold in winter. Their value to man lies in the number of insects and other invertebrates which they eat.

TIME ENOUGH

The impatient diner sent for the manager of the restaurant. “See here!” he exclaimed. “I ordered cold roast beef 30 minutes ago and I haven’t got it yet.” “How long ago?” “Thirty minutes.” “Good gracious, I’ll have to see about that. It should be cold by this time.”

More of Nature

Mr. Bacon—Did you hear those measley roosters crowing this morning early? Mrs. Bacon—Yes, dear. Mr. Bacon—I wonder what on earth they want to do that for? Mrs. Bacon—Why, don’t you remember, dear, you got up one morning early and you crowed about it for a week.—Watchword.

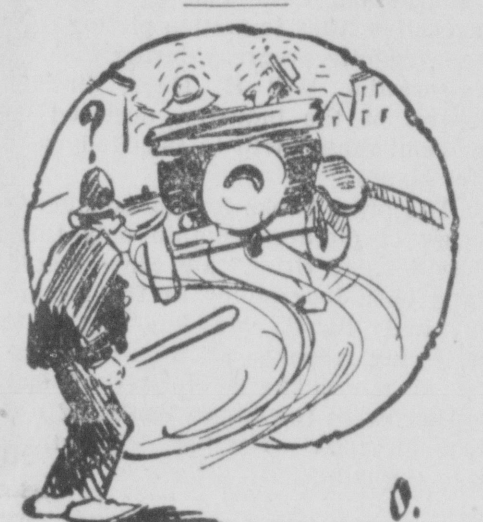

Nearly Bankrupt Two Ways

“So you lent Harbinger the money, did you?” “Yes.” “What did he say?” “He promised to pay with alacrity.” “He did, eh? Well, let me tell you this: If there’s one thing that’s scarcer with him than money, it’s alacrity.”

Amenities

Peeved Young Wife—I don’t care! I only married you because your hair waved the same as Jack Harlow’s. Jolted Husband—Is that so? Well, I only married you because you used the same flavor lipstick as Madge Morton.

FROM CLOSE SHAVES

She (learning to drive)—W-w-w, what is that peculiar knock I hear? He—That’s just my heart beating, dear.

Give and Take

Some of us lose, some of us make, But be we losers, be we makers, Life is a game of give and take, With odds in favor of the takers.

All in Vain

“Have you anything to say why sentence should not be passed on you?” asked the judge. “Not a word. I made speeches the last three times I was convicted, and they didn’t seem to do me any good,” replied the prisoner.—Heart of Home.

No More for Him

“Any inquiries?” asked the washing machine agent. “Lady on Umsteenth street wants a demonstration.” “Let her tell it to somebody else. I did her washing last week.”

Safe So Far

Squire’s Daughter—I hear your youngest son is going to be married. I hope he will be lucky. Giles—Well, I don’t see why not. He came through the war without a scratch.—Stray Stories.

HE WAS RATTLED

Friend (who has dropped in)—What’s the matter, Jim? You seem to be rattled. Jim—Do I? Well, we’ve just had a big shake-up in this office, you see.

Last of Grandpa

Grandpa in a motor car Pushed the lever back too far. Twinkle, twinkle, little star, (Music by the G. A. R.)

In Style

Mrs. Wag—This magazine says a formal dinner is incomplete without nuts. Wag—Well, my dear, you always invite some to yours.

His Point of View

She—I was thinking, Aubrey, of the blissful days of our honeymooning. He—Oh, yes—the blissful days.

THOUSANDS OF PEARLS IN BURIAL

Find is Called “The Great Pearl Burial” by Prof. Harry C. Shetrone—Nose Piece, Helmet, Tusks, Carved Tortoise, Found—Art Shows Sophisticated Knowledge of the Beautiful—Detailed Interview.

Chillicothe, Sept. 11.—Strewn with thousands upon thousands of fresh water pearls, taken from Ohio and Mid-west streams forgotten centuries ago by Mound-builders, four skeletons in “The Great Pearl Burial” were uncovered in their entirety by Prof. H. C. Shetrone, Ohio museum curator and his staff of archeologists Thursday afternoon, when another cut was made into the huge Pricer mound of the Seip mound near Bainbridge, west of this city.

The countless thousands of pearls, in the main prepared for stringing, were of all sizes some of them being as large as a hazel nut. In addition to these were copper and silver ornaments, copper helmets and a copper piece that had been inlaid in the nose of one warrior. The feet of the four burials uncovered Thursday were brought to light several days ago, and some rich finds were expected.

In an official statement to newspapermen Thursday, Prof. Shetrone said:

“It is a burial of four Mound-builders, the bodies laid side by side, covered over by a log structure or charnel house and this in turn covered over with a canopy fastened down with bone skewers.

“As to the skeletons, they appear to be those of adults, but as yet we cannot determine the sex. They must have represented a family group, or else were prominent personages of the tribe, judging from the preparations, the evidence of ceremonies and the extraordinary profusion of pearls. It may have been the burial of a royal family.

“The pearls are the most beautiful collection I have ever seen.”

Prof. C. W. Mills, Columbus, prominent and nationally known archeologist, was present as was Gerard Fowke, who stayed over several days to see the skeletons exposed in their entirety. Prof. Mills says that he expects to find

the mound full of such burials. Only a fourth of the mound has been pierced. When the work was completed, Thursday, the bones were covered with a tarpaulin and a sentry was placed to guard the ancient sepulchre.

Harry Goodwin, registrar of the Ohio museum, was on the field today.

Why They Chuckled

Smith was troubled by his neighbor’s hens. One day he was looking at them over the fence when he inquired, “By the way, Jones, what did you pay for those fowls?” “A dollar apiece,” replied Brown. “Ah, that explains it,” said Smith. “I wondered what the things had to chuckle about.”

Length and Age

The Great Wall of China is the longest but not the oldest wall in the world. It was built about 214 B. C., but the walls of Jericho were built fifteen hundred years before the birth of Christ, and are thus about 3,500 years old.

FOR TRADE FOR GROCERY OR RESIDENCE.

We have a fine 86 acre farm with new nine room frame house, good barn and other outbuildings, good soil all tillable, 1½ miles from good market for trade for Circleville grocery or residence. You don’t need any extra money to make this deal. All that is necessary is a grocery or house that is satisfactory.

SAVE THEM

Circleville, Ohio, R. F. D. 1, Aug. 26, 1924. MR. F. L. FICKARDT: All spring I have been having trouble with my flock, both young and old. During July I lost about 100. Quite a number had LIMBER NECK or PTOMAIN. About August 1st, I began use of your DROPS, and I can say the results fully justified your statements. One case of Limber-Neck was too sick to take the medicine. I gave it some with a dropper, thinking then it was a waste of time, but the next morning it was still around and finally got well. The rest of my flock straightened out and are doing well now. Sincerely, MRS. LUCY HONNOLD, Cellina, Ohio, R. F. D. 4, June 19, 1925.

F. L. FICKARDT: Dear Sir:—

Find enclosed one dollar for which send me Fickardt’s Roup and Cholera Drops.

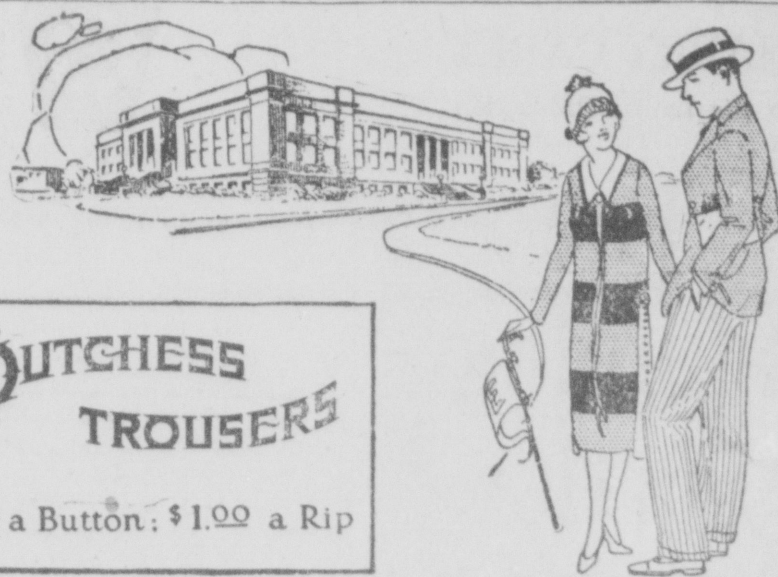

I used one package and it helped my chickens and cured them of cholera.

I thank you, Mrs. L. P. Lenhart.

P. S.—Send as soon as possible, a neighbor wants some of it for her chickens are sick.

FICKARDT’S ROUP AND CHOLERA DROPS is a remedy for Roup, Colds, Sneezing, Limber-neck, White Diarrhea and Bowel Disorders.

Price 50c. Tablets by mail. Liquid from Dealers. F. L. FICKARDT, Circleville, Ohio.

For those who go to College and those who don't

Correctly dressed young men, on college campus or at home here in town, are now wearing coats and trousers of contrasting shades.

This means separate trousers. And separate trousers invariably mean Dutchess Trousers, if you are looking for style, fit, comfort and long wear. Dutchess Knickers, too—for golf, motoring, hiking, or just plain “roughing it”.

With our complete line of Dutchess Trousers and Knickers, in a variety of pleasing patterns and durable fabrics, we can fit you perfectly and satisfy you completely.

And besides, they’re all backed by that famous, money-on-the-spot Dutchess Warranty—10¢ a Button; \$1.00 a Rip.

GRAND CHAPTER MEETING.

The grand chapter of the Royal Arch Masons meets in Akron Wednesday, September 30.

ROOSEVELT HUNTERS PLAN TRIP TO CHINA

Quest of Rare Animals in Asia May Extend Tour.

Amritsar, India.—The Roosevelt expedition in quest of rare animals of the mountains and jungles of Asia, had not decided when it passed through Kashmir on its way to the Pamirs, by just what route it would return or how long its trip would last.

There was some prospect, it was said, that the tour might be extended to January and that it was possible the expedition might be continued into China and not return to India.

The expedition, including Col. Theodore Roosevelt, Kermit Roosevelt, George Cherrie and Mr. Cutting, a cinema operator, made the first part of its trip into India without incident. The members traveled over the well-known route from Srinagar to Leh and Ladakh.

There is abundant game in that section of the country, but the expedition was interested in getting the ovis poll on the lofty heights of the Pamirs and the long-haired tiger in the Thilashan mountains of Chinese Turkestan.

Ovis Poll Hard to Shoot.

The ovis poll, or Pamir sheep, is not so rare as some may think, but as it habitates the high part of the Pamir range, the shooting of it is made difficult. This animal is the largest of the sheep family and sometimes weighs 300 pounds. Its head is beautified by its horns, each of which grows into a spiral form, five or six feet around the curve. The long-haired tiger found in the Chinese Turkestan regions often grows to a length of 12 feet.

The Roosevelt party went to Rawalpindi by train in the blazing heat of May when the thermometer registered 115 degrees in the shade. From Rawalpindi the party went by automobile 202 miles up and down the mountainside.

The travelers, while in the Kashmir valley, were guests of Sir and Lady John B. Wood, but they remained only sufficiently long for their transport arrangements to be made.

Made Haste to Avoid Cholera.

Their haste in getting away was due to the fact that this year there is a cholera epidemic of more than ordinary proportions. Deaths have been occurring at the rate of 1,500 to 1,700 a week since.

In the preparation of their equipment Colonel Roosevelt and his associates were ably assisted while in Kashmir by Maj. A. J. Hinde, assistant resident of Kashmir and British joint commissioner of Ladakh. In the

transportation of their equipment and supplies coolies and yaks were used during the first stages of the journey throughout the Leh regions. Coolies are hired for 24 cents a day and ponies for 30 cents a day as far as Leh.

During the first 100 miles to Leh the expedition met Reverend and Mrs. Heber of the Moravian mission; Mr. and Mrs. Owen Jones of Chicago, and Maj. George Van B. Gillan, consul-general at Kashgar, who represents the American as well as British interests.

Obtain Passports From Peking.

In order to go into Chinese Turkestan the Roosevelt expedition was obliged to obtain permits from the Peking government, which enabled them to enter territory which is truly a sportsman's paradise and very little traveled by white people.

Only 12 passes a year are given to travelers to visit Leh and Ladakh, six for the first half and six for the latter half, this being necessary because of food problems, much of the food having to be taken from Srinagar.

In addition to their interest in the hunting for rare animals members of the expedition always were confronted with food problems and some of them, especially Kermit Roosevelt, took every opportunity to help solve these. He always had ready his fishing rods and used them to good advantage for the entire party in the Dras and Tarkand rivers.

News Comes Slowly.

The progress and success of the Roosevelt expedition is being watched with considerable interest by English sportsmen now in India, although the news that filters through is very meager.

It is much the same as it was on the last Everest expedition when the news India received of the mountain climbing was dated London. Most of the dispatches that have come through up to this time merely said: "All's well with the Roosevelts," or words to that effect.

War on Suggestive Movie

Titles Bringing Results

Hollywood, Cal.—The fight against suggestive titles to motion pictures has made definite progress during the last six months, Will H. Hays, director general of the industry, declared on his semi-annual trip to the Hollywood film plants.

"The press books for the coming releases of pictures contain only three objectionable titles," Mr. Hays stated. "The open-door policy of the producers and distributors has met with gratifying response all over the country in the shape of letters of suggestion as to the improvement of motion pictures. Further suggestions from the public are solicited."

"The Store That Treats You Right."

"Get in the Well Dressed Circle"

A feature in connection with Club Clothes is the fact that the models are always correct and in good taste. The designing staff steers clear of the extreme, which accounts for the good looking lines of Club Clothes.

We are showing a splendid array of dependable fabrics in the season's choicest colorings. Among them you will find the suit which you will want, which will fit you and which you will enjoy wearing.

And when you consider the low prices at which Club Clothes are sold, you naturally wonder how it is done. The answer is simply this: Club Clothes are manufactured by a large organization with a large sales volume.

The tailoring factories are operated on a highly efficient basis and the cost of manufacture is reduced to a minimum. Let us show you.

ing of Saloon Is Accepted
With Satisfaction.**

coming week, was prepared under direction of the Rev. F. Ernest Johnson, head of the Federal Council's Research and Education department. In a foreword, he declared the study had been undertaken in order to give a "fair appraisal," unbiassed by personal opinion and uninfluenced by the great mass of current literature which had emanated from biased sources.

MILL OWNER CHARGED WITH EMBEZZLEMENT

Hearing on the extradition of C. C. Traux, formerly of Delphos, Ohio, for the alleged embezzlement of \$5,000 from the Del Carmen Land Co., of Bluefield, West Virginia, was resumed Saturday morning before Governor Donahey. Executive Secretary James W. Huffman is taking the evidence in the case. Traux recently was arrested here by local authorities on complaint of West Virginia officials that he was a fugitive from justice. A former attempt at extradition was denied.—Columbus Dispatch.

Mr. Traux was a former general manager of the Dixie Mills, this city, and is now sole owner of the Maizo Mills.

Current Styles in Hats Reflected in Neckwear

Many handsome autumn hats present themselves in the company of neck pieces made to match. This pretty whim of fashion reveals scarves, chokers or collarettes of silk, velvet, felt or velours, endlessly varied and very chic. The hat and choker pictured are made of black velvet, brightened by gay coin dots of narrow silk braid in three colors.

FORD CAR WRECKED

The Ford touring car of Mr. and Mrs. Tom Thomas, of Walnut street, was wrecked on the pike near Columbus Sunday evening by a passing auto. None of the occupants of the Thomas car were injured.

FELL FROM SWING.

Robert Rector, son of Mr. and Mrs. Edward C. Rector of Kinderhook, fell from a porch swing at his home last Thursday and sprained his right wrist.

BIRTHS

To Mr. and Mrs. Clarke Marion, of Hamilton, Monday, September 14, 1925, a son. The father is a son of Mr. and Mrs. W. H. Marion of East High street.

Storm Does Vast Damage in Detroit and Environs

This photograph shows a Detroit street with roadway ruined by a recent rain storm which caused over \$1,000,000 worth of damage, inundating large areas, flooding cellars, washing away pavements, ripping up gutters and seriously crippling transportation in the city.

COMPOSERS MUSICAL NOTES ARE SILENCED

**William H. May, Tutor and
Composer of Music Dies at
Radium Hospital Sunday.**

William H. May died at the Radium hospital, Columbus, Sunday at noon, where he was taken last Friday for treatment. His death was due to intestinal trouble and appendicitis.

The deceased was a tutor and composer of music and had made his home in Washington C. H., since 1887.

Mr. May was 70 years of age. He was born in Gorgansville, North Carolina, and was the son of Dr. John W., and Elizabeth Ann Wilson May.

He was twice married. His first wife was Miss Mollie Jennings of Atlanta. She died in 1889. In 1893 he married Miss Pinta V. Stokesbury, of Washington C. H., who survives; also Carroll H. May, of Columbus, a son by his first wife.

Of his immediate family one brother, Dr. John B. May, of New Holland, is living. He was an uncle of Attorney Charles H. May, of this city.

The deceased was a member of the Dublin Hill Methodist church until 1887, when he changed his membership to the Methodist church at Washington C. H. Socially he was a member of the Knights of Pythias lodge.

Arrangements have not been made for the funeral.

VETERAN OF THE CIVIL WAR ANSWERS TAPS

**Father of Seventeen Children
Died at Ashville Friday,
Burial at Williamsport.**

Morris Hafey, a veteran of the Civil war, died at his home in Ashville Friday, September 11. Deceased was a son of John and Mary Dwyer Hafey, natives of Ireland, and he was born at Briston, England, February 28, 1843. He was twice married, the father of 20 children, 17 of whom survive.

The funeral services were held from St. Joseph's church Monday morning at 9 o'clock Rev. Father J. S. Hannan officiating. Interment was in Spring-lawn cemetery, Williamsport.

E. F. Roebuck was a visitor in Detroit, Michigan, over Sunday.

PERSONALS

W. C. Baldwin was a business visit in Columbus today.

Miss Frances Boeher of Hallsville is the guest of Miss Louise Renick.

Mrs. G. L. Schiear and daughter, Mary Jane, spent the day in Columbus.

Mrs. Lemuel James accompanied by Miss Elizabeth Frey left Monday for the White Mountains.

Miss Rebecca Gordon has secured a position as teacher in the public schools at Clarington, Ohio.

John Shaw, of Utica, New York, who has been the guest of his wife at New Holland, has returned.

Miss Gladys Boyer, of Stoutsville, will take a course in training at the White Cross hospital, Columbus.

Lucille Myers, of Stoutsville will leave next week for Cincinnati where she will take a course at a business college.

Miss Winnifred Huddle, of Stoutsville, left today for Cincinnati where she will enroll as a student at the University of Cincinnati.

Mrs. Rose Miller, of Columbus, who has been the guest of her parents, Mr. and Mrs. Wilson Valentine, at Stoutsville, has returned home.

Robert Kefauver, son of Dr. and Mrs. Kefauver, of Stoutsville, left today for Tiffin where he will enter the sophomore class at Heidelberg college.

Carl Frazier, on of Mr. and Mrs. Oscar Frazier, who spent his vacation at his home in Stoutsville will leave this week for Washington D. C., where he will teach ancient history in the university.

Miss Lillie Bond, of Wauseon, who attended the Bolender family reunion remained over and is the guest of her cousin, Miss Ida Bolender. The latter is seriously ill. Miss Bond will remain until the Pumpkin Show.

Miss Mary Holman left Saturday for Washington D. C., where she has secured a position with the board of Children's Guardians of the District of Columbia. Miss Holman will do welfare work and will have charge of the placing department.

Milton Friedman, who has been across the seas in London, England, for the past three months with his brother, Ted Lewis, on a two months' engagement, has returned home. His brother and wife accompanied him as far as New York City.

Open Church on Heights of Shenandoah Mountains

Orkney Springs, Va.—Consecration ceremonies for the Shrine of the Transfiguration, an edifice of native, unburnt stone erected on the heights of the Shenandoah mountains to the memory of prominent clergymen and laymen of the Episcopal church in Virginia, drew a large assembly of church representatives here.

Bishop William Cabell Brown of Virginia was the presiding dignitary for the ceremony.

NEWS ABOUT COURT HOUSE

**General Happenings Taken
From the Records of the
Various County
Offices.**

Compounding A Claim.

Jacob Young and Flora Murray, administrators of the estate of Henry Phillips, deceased, have filed an application in the probate court of Pickaway county, asking for an order of the court directing them to compound a claim of said estate against the estate of Susana Adams, deceased, amounting to about \$3,211.

The claim is evidenced by a note for \$1300 secured by mortgage on 21.57 acres of land in Fairfield county. The note and mortgage is dated March 26 1892. George G. Adkins represents the administrators.

Marriage License.

Bryan Riffe, 29, farmer, and Edna Waite, 33, both of Saltcreek township.

HAD 286 OPERATIONS

George Gillespie, thirty-seven, Pittsburgh (Pa.) police sergeant, is now recovering from his two hundred sixty-eighth operation. The operations followed injuries suffered in an automobile accident two years ago. Nineteen of them were major ones. Gillespie by his latest operation lost a leg.

Cites Big Drop in Crime in Britain in 50 Years

London.—Better education, an increase in sobriety and an advanced standard of living have resulted in a tremendous decrease of crime in England in the last 50 years, Sir William Joynton-Hicks, home secretary, told the International Prison Congress.

He said that in 1875 there were 10,000 persons undergoing penal servitude. Now, he said, there are only 1,600 in spite of the increase of population. Besides this number there are 1,100 young people undergoing correctional treatment.

CONSTITUTION DAY SET ASIDE BY GOVERNOR

**Fixes Sept. 17 as Time for all
Citizens to Consecrate
Themselves Anew.**

September 17 was proclaimed Constitution day, Saturday by Governor Vic Donahey, in an official proclamation, calling attention to the disregard that many persons have of the American constitution.

"The doctrine that the governed should have a voice in the making of the basic laws for their protection has persisted from the earliest times, but did not come to final fruition until the founding of the United States of America," said the governor. "No more perfect theory of justice was ever advanced than that written into our federal constitution. The patriotic and liberty-loving authors of that document handed to posterity a legacy that has proved to be one of the greatest achievements consummated by mankind.

"One hundred and thirty-eight years have witnessed the actual working of federal constitution in the development of our political, social or economic structure. With the exception of a few supplementary amendments, we still abide by the dictates laid down for us by the fathers at the crucial infancy of our country. Ours is the oldest written constitution in the world and so long as the people rule their government it will continue to exist, but if this government is permitted to rule the people it is not a far cry until our nation will be numbered with others that have passed out of existence," the proclamation reads.

"There are those who profess alarm at the growing disrespect for laws, and the time is opportune for all citizens to consecrate themselves anew to strict law observance and to the study of our constitution. For its destruction we need have no fear. It has stood the acid test.

"All American citizens should have a thorough understanding of this remarkable, world-famous document. Its provisions may be understood by everyone, as ambiguity is lacking."

MISSION LASS MAKING FIGHT FOR HER LIFE

**Unknown Assailant Attacks
Alberta Perry as She Lay
Asleep Beside Her Mother.**

Columbus, Sept. 14 (UP).—Alberta Perry, 14 years old, is near death in a hospital here suffering loss of blood when her throat was slashed by an unidentified assailant as she lay asleep beside her mother here early Sunday.

The young girl is a singer at Salvation Army services. Police have been unable to discover any motive for the crime.

Muddy footprints were found on the sill of the kitchen window but there were none upon the floor. Police believe the girl's assailant was a "ripper" who entered the house after the family had retired.

The razor cut in her throat slashed the jugular vein and only the action of Police R. E. Wynn in holding it closed with his fingers until the girl reached the hospital, saved her from death by loss of blood.

Miss Flora Dunlap, of Des Moines, Iowa, is the guest of her parents, Mr. and Mrs. S. W. Dunlap, of South Court street.

SOCIETY SHOCKED; WEDDINGS ARE OFF

Two American Girls Are Not to Be Brides of Titled Foreigners.

New York.—The marriage plans of two American society girls and two blue-blooded foreigners, have gone awry.

Miss Emmeline Marion Grace, daughter of Eugene G. Grace, president of the Bethlehem Steel corporation, is not to wed Sir Michael William Shelby Bruce, adventurous young Scottish baronet, because he is to marry an English girl.

Dispatches from London said that Sir Michael, a captain in the royal field artillery, and alleged descendant of Robert Bruce, hero king of Scotland, would become the husband of Miss Doreen Dalziel Greenwell, daughter of a British army colonel.

Engagement Ball Held.

Miss Grace's engagement was announced by her parents last December from their home in Bethlehem, Pa. It was celebrated by a ball at the Hotel Bethlehem. Mr. Grace's secretary from the steel magnate's summer home at Southampton, L. I., recently, said Miss Grace's engagement was broken several months ago and that this fact was known to her friends here and in London.

Disappointment came to Lieut. Ernesto Lardnelli Becchi, first assistant secretary of the Italian ministry of the interior, when he arrived on the liner Providence to learn that his contemplated marriage to Miss Nancy Sayles of Pawtucket, R. I., has been postponed indefinitely.

Will Return to Italy.

A few hours later Lieutenant Becchi intimated he would return to Italy without a bride, Miss Sayles is reputed to be the wealthiest girl in Rhode Island.

Her mother, Mrs. Frank A. Sayles, gave no reason for postponement of the marriage.

Lieutenant Becchi is a Roman Catholic and Miss Sayles a Protestant.

Lieutenant Becchi left \$37,500 in jewelry, his gifts to the prospective bride, in the hands of custom officials. He didn't want, he said, to pay duty on something he might not need.

Use Coney Island Police as Nurses for Children

Albany, N. Y.—The latest method employed by mothers in disposing of their children so they may be free to enjoy the sights and pleasures of Coney Island has been revealed by the state commission of prisons. It is intentional abandonment in the vicinity of an obliging policeman with the certain knowledge that the child will be picked up and cared for during the day at the Coney Island police station.

The method is cited in a report made public of an inspection by the commission of the state, the Twenty-eighth precinct of New York city. The inspection was made July 4, and it was found that 75 children were brought into the station house on that day up to 9 p. m. A total of 1,200 "lost children" had been cared for at the station up to that date, most of them since early in May.

"It seems to be pretty well established," says the report, "that many women coming to Coney Island, bringing their children with them, purposely abandon them knowing they will be taken up by the police and kept until after they have finished their day of pleasure, after which they call at the station and recover them. It is also quite certain that few children stray from their parents unless the parents are careless or are not much concerned as to their safety and welfare."

Polish Government Has Four Big Monopolies

New York.—The establishment of a match monopoly by the Polish government, which, as recently announced, will be operated for 20 years jointly by an American and Swedish corporation, brings the number of state monopolies in Poland to four. The others are alcohol, tobacco and salt.

Revenues from the existing monopolies during the first quarter of 1925, official reports received by the American-Polish chamber of commerce show, amounted to \$15,000,000. The budget estimates for the current year anticipate total net receipts from the existing monopoly, at \$78,000,000.

Profits from the monopolies will constitute about 18 per cent of the government's revenues this year.

The alcohol monopoly is expected to yield \$20,000,000 in 1925, the first year of its operation.

Well More Than a Mile Deep

Syracuse, Kan.—What is claimed to be the deepest well in Kansas is the oil test being drilled a few miles southwest of Syracuse. The hole is now down more than a mile. The drilling of the well has been in progress many months and in spite of the great depth that has been reached the drillers have no notion of stopping.

Methodists to Found School

New York.—A new university will be established at Kansas City, Mo., by the Methodist Episcopal Church South and the Methodist Episcopal church, with the co-operation of the city chamber of commerce.

ANOTHER HOAX IS EXPOSED

Napoleon, O., Sept. 12.—(UP.)—Coue was right—thinking—makes one ill or well.

In support of his doctrine many rheumatic folks about Ridgeville, O., will testify, after their experience with magic belts sold to them for \$20 to \$65.

All patients were rapidly improving until the hoax was exposed by one of the purchasers.

Henry Cammann made a down payment of \$20 on a \$65 belt. When the man and woman, posing as representatives of the Lutheran Seminary, Fort Wayne, failed to return for the remainder of the \$65, Cammann phoned to the Seminary.

The Seminary officials advised him they knew nothing of the magic "sure cure" belts and that he was apparently the victim of fakers.

The expose spread rapidly and the owners of the belts had their pains and aches return—goaded by the realization they had been "taken in."

County authorities are searching for the couple traveling in an auto. They sold a cheap variety of belts with a wire coil under the lining to give them a "magical" appearance.

BUYS A NEW NEWSPAPER

The following item, which was accompanied by a photograph of James G. May, son of Dr. and Mrs. John B. May, of New Holland, was taken from the latest issue of the Publishers' Auxiliary, a trade journal of the publishing profession:

"The New Concord Enterprise changed hands recently, James G. May taking charge of the publication, which is now in its forty-fourth year. 'Jimmie' May enters this new field ripe in experience and fully equipped to make the Enterprise live up to its name. A graduate in the class of 1913 of the school of journalism, University of Missouri, he was on the Cleveland Press for five years, later classified manager of the Akron Press, had connections of several years' standing with the Cleveland News, followed by two years of editing and managing the Weekly Transcript at Dresden. Mr. May is a member of the Delta Upsilon fraternity. With Mrs. May and the three children he has taken up permanent residence in New Concord. 'Jimmie' has three hobbies: His family, his newspaper work and to see some husky lad in mole-skins tearing off 100 yards for a touchdown."

OLD TIMERS' PICNIC

At the home of Mr. and Mrs. Charles L. Clifton, west of New Holland Friday, an old timers home-coming was held. Between forty and fifty were present and all enjoyed the occasion hugely; among those from out of the old home township present were Attorney and Mrs. Charles H. May and son David, of this city; Mr. and Mrs. John D. Fidler and daughter Miss Eleanor, St. Louis, Mo.; Mrs. Herbert Martin, Des Moines, Iowa; Mrs. Lena Robinson, Mrs. Elma Kouns, Mrs. John Durant and daughter of Washington C. H.; Mr. and Mrs. John H. Dunlap and son John, Williamsport; Misses Alma and Estella Grimes, Mr. and Mrs. Channing Vleercome and daughter Elizabeth Ann, of this city.

Resolution Too Late

The resolution to avoid an evil is seldom framed till the evil is so far advanced as to make avoidance impossible.

True Progress

The only progress which is really effective depends not upon the bounty of nature but upon the energy of man.—Buckle.

LIGHTING HINTS FOR CAR SAFETY

Laws Require Adjustment and Operation to Insure Protection on Roads.

(By S. J. Williams, Director Public Safety Division, National Safety Council.)

Laws in most states now require that 30 minutes after sunset until 30 minutes before sunrise no automobile shall be operated unless it has sufficient lights, so adjusted and operated as to make the highway safe for the public. Motor vehicle headlights should enable the driver to distinguish clearly a person, vehicle or obstruction at least 200 feet ahead. Dangerous glare or dazzle should be avoided.

Lights to Display.

Cars should display: (A) Two headlights when in motion, one on each side, both lights of equal power. Headlights should be white or tinted but never red. (B) Headlights or side parking light when motionless. Lights should be visible at a distance of at least 500 feet. (C) One tail-light, red, that is visible at a distance of at least 500 feet. Lights should be displayed whether car is in motion or standing. Tail-light should be at left or center of car and illuminate license number plate with a white light.

The Illuminating Engineering society, after considerable investigation and experimentation, has formulated a table of headlight intensities at different angles which has been widely circulated. If headlights conform to this table, all dangerous or dazzling glare will be eliminated. Many states now require headlights to conform to these specifications and most manufacturers are able to furnish such headlights. Some of the patented devices now on the market, however, do not necessarily make the headlight intensities conform to the standard. When purchasing such devices, buyers should ask for a guaranty. This guaranty should state the size of the lamp to be used, the tilt of the headlight, focal adjustment required and instructions how to get these adjustments.

A home-made arrangement can be devised to give satisfactory results if lens is properly covered, frosted or painted (not red). If light is at or back of focus, paint upper half of lens; if ahead of focus, light rays cross, so paint lower half of lens.

Sizes of Bulbs.

Different devices require different sizes of bulbs. Headlight bulbs in some states are not allowed to exceed a rating of 24 candle-power; in other states the maximum is 32 candle-power.

The bulb in some headlights can be moved slightly backward or forward by adjusting a small set-screw. To focus a bulb, allow light to shine on a wall 25 feet away. Move bulb backward or forward until the circle of light on wall is of smallest possible diameter. The majority of headlight devices call for this adjustment. A few call for an adjustment either behind or ahead of the focal center; correct adjustment for either position gives largest possible spot of light without a dark or shaded center.

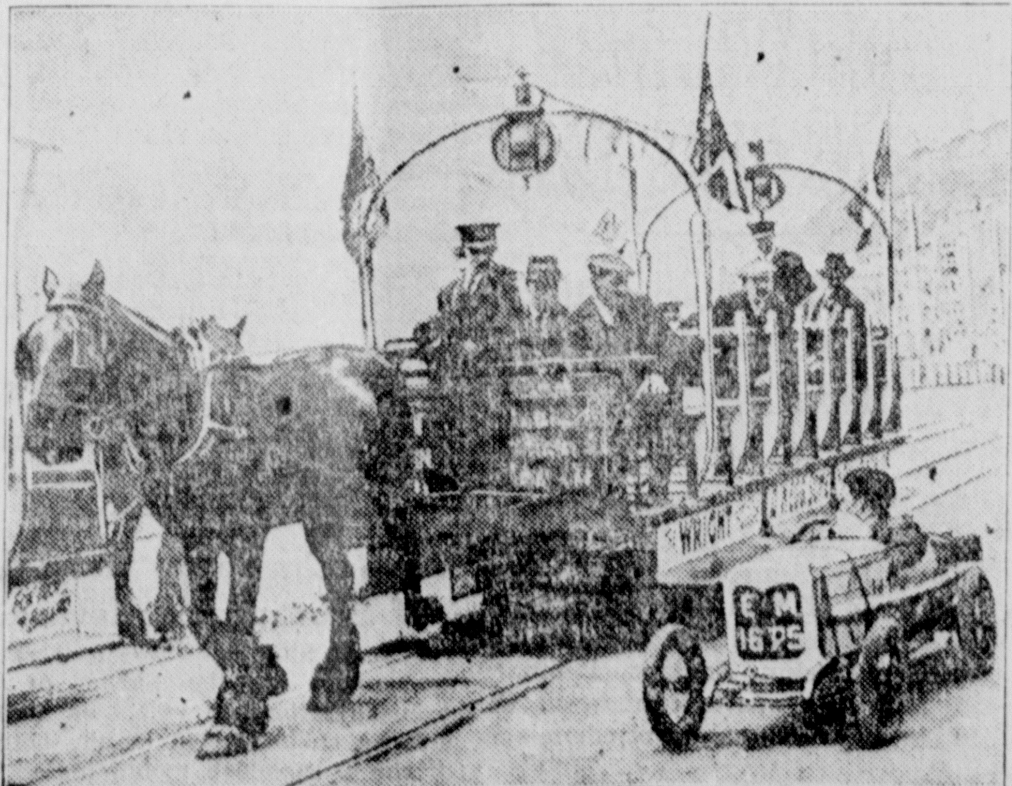

Headlights should be tilted up or down as required by the different types of headlight devices. Car vibration easily changes the tilt and focal adjustments; frequent tests and readjustments are necessary.

Spotlight should be installed as high up on the car as practicable. It should be impossible to make the center of its beam of light strike the level highway more than 50 feet ahead of the car; except when swung 30 degrees to right or left of straight ahead position, then no limitation is placed on the height to which the beam may be raised. Size of lamp used in spotlight should not exceed a rating of 21 candle-power.

Always carry a spare bulb for your headlights, the same as you do a spare tire.

Headlight lens may loosen and rotate in the frame; inspect it frequently, adjust and tighten if necessary. Reflectors need careful attention.

SMALLEST AUTOMOBILE EVER CONSTRUCTED

A miniature motor car which can travel at 45 miles per hour, has just been built by an English amateur enthusiast named Malins, who is shown in the photo. The engine, which is only 1½ horse power, is fitted at the rear. Photograph shows passengers on the antiquated horse traffic at Douglas, Isle of Man, much amused at this example of modern conveyance.

Knocks Indicate Trouble Somewhere in Engine

Ability to tell one knock from another forms an important part in the education of the motorist. They may be classified under the four general heads: Spark too far advanced, overheating, carbon in cylinder head, and loose or worn parts.

A spark knock occurs only when the engine is pulling against heavy load, as on a hill. If the knock disappears when the spark is retarded and comes on again when the spark is advanced, it is evident that excess carbon is the trouble.

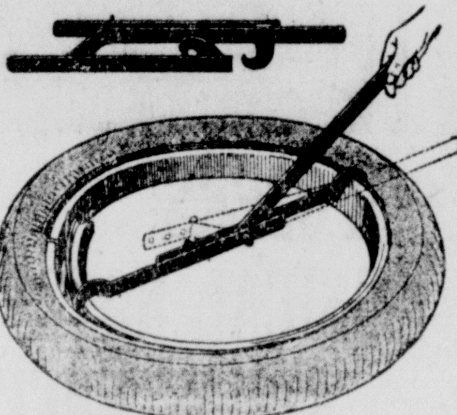

A knock due to overheating will also be noticed on a hill, but it occurs on level roads. As it is always accompanied by steam from the radiator, it is not difficult to identify.

Carbon knocks may be mistaken for a knock due to overheating, as it increases in loudness on a hill and has another symptom in common, that of causing the engine to run after the switch has been opened. To make sure of this trouble remove a spark plug or a valve cap and look into the cylinder. If the parts are slightly discolored there is nothing to fear, but if there is much carbon it will be obvious.

Having eliminated all three above, there remains the possibility of piston slap or of some bearing working loose. Piston slap occurs mostly in old engines and cannot be removed without regrinding cylinders and fitting new pistons and rings. This knock is not dangerous. But a part coming loose may wreck the engine, so do not experiment, but have an expert take up the search at this point.

Adjustable Rim Tool

A new tool for the removal of automobile tires consists of two adjustable bars connected with thumb screws to a handlebar, by which the tool is expanded or contracted when the rim is engaged by lug hooks at the outer

Contracting a Rim With a New Tool for Tire Removal: The Tool Is Adjustable to Any Size of Rim.

ends of the bars. The tool may be adjusted to various-sized rims by merely changing the thumb screws to different holes spaced along each bar. It is made to fit any one-piece split, demountable auto rim, and enables the tire to be removed without injury.—Popular Mechanics Magazine.

Worn Piston Rings Will Cause Overheated Motor

The average motorist, when he becomes aware of an overheated engine, usually thinks immediately of such common causes of motor heat as the lack of oil or water. There are, however, still other reasons that are just as potent and dangerous. One of these is the worn piston ring.

Automotive experts tell us that, on each compression stroke, part of the gas vapor passes down past the loose-fitting piston rings into the crank case and there condenses and mixes with the oil, thus causing a gradual thinning out of the lubricant. Consequently the rubbing steel parts are "starved" of oil, and friction at once begins. The mixture of oil and gas, the function of which is to form the film of oil between the cylinder walls and pistons, is soon broken down under the intense cylinder temperature. The gasoline immediately burns under high temperature, leaving a carbon deposit and leaving the rubbing surfaces hard and dry. This, cannot help but create heat, which at once registers on the heat indicating device placed on the radiator cap, thereby warning the motorist to act before it is too late.

A GOOD EXAMPLE

Two Washington fire guards were arrested for smoking and for leaving campfires burning in the forest they were "protecting." An Oregon man was fined \$100 for refusing to help put out a fire he had started, saying that he had lived there for 47 years and he "knew all about fires."

The Northwest has just gone through a bad fire season; it will take a lifetime to put many burned-over areas back to the condition they were in last spring. A law that punishes the careless, defiant or criminal user of our forests, is a good law that needs rigid enforcement.

Use Wisdom in Giving

Waistline Normal
Again in England

London Designers Have Restored Belt to Traditional Place.

Surprises are not common in the study of styles, but they do happen, says a fashion writer in the New York Times. All the while the fashion creators at Paris and their confreres on the other side of the water have been debating the return to the normal waistline one has only to set foot in London to find it has arrived. The question has remained for months a matter of conjecture; but British decisions are deliberate, and the belt is once again placed at the natural line. Prominent designers in London are not giving special emphasis to the fact, reluctant, perhaps, to take a too radical step before Paris has given her sanction.

To the English woman of fashion Paris is still the center of styles creation, however loyal she may be to her own country's ideals and productions. This year there has been a broadening of horizon, a more sympathetic feeling, largely the result of the Exposition des Arts Decoratifs, beneficial to both London and Paris. This does not mean that English women accept unconditionally the decrees of Paris or any other authority. Individuality is still their precious possession, and an Englishwoman will wear what she chooses with the complacent assurance that it is she who is setting the style. At least it is the fashion as it should be, whether or not the rest of the world follows. This may, in a sense, account for the revival of the normal waistline. Leading London modistes do not admit wholly that the long waist and straight silhouette are passe, for they are still the lines upon which some of the handsomer models are built by both English and French creators.

Center of Fashion.

There is always a certain satisfaction in dealing with "headquarters," and in London one finds oneself at the very center of fashion in sports dress. We have long looked to England for authority in tailored clothes, in coats, in overgarments of different sorts. We have referred to fabrics as "English" material when a more specific name is lacking. London sports togs, famous the world over, are the joy of an American sportswoman's heart. They have simplicity and dignity through rapidly changing styles. Novelty may come and fads may go, but a manish tailor of Scotch tweed or Irish homespun has an honest-to-goodness look not to be ignored.

There are kashas and cloths of different weaves and weights, but the first thing the smart tailor offers you is a conventional two-piece suit of wool mixture, diagonal, or woven all in one color. In an unusually gay sports season fashionable women are wearing the simplest of these tailored suits, in the roughest finish materials, for golf and tennis, for motorizing, hiking and shooting. The plain wrap-around or kilted skirt, with box coat,

Frock That Is Done in Beige Jersey Cloth, With Attached Cape.

short or hip length, a plain polo shirt or overblouse is almost a uniform among English sportswomen. The coat has plenty of pockets. When a shirt is worn there is also a belt to define the normal waistline. In an outfit of this description a woman is comfortably and fully equipped for any country sports and has a look of correctness.

A variant of this regulation sports suit is a sweater or jumper instead of the coat. There are many kinds, colors and patterns of sweaters—some to match the skirt, some in gay, bizarre patterns and in endless unexpected combinations. The topcoat with this arrangement is longer and more voluminous.

One of the ultra-smart jackets offered by a well-known London designer is made of leather. It recalls the old-fashioned shooting jackets met used to wear but in its feminine version it is a trim and shapely affair.

A shooting costume from a London-Paris house of high standing has a kilted skirt of black-and-white kasha in a large block pattern. With this is the ordinary shirt of white silk broadcloth belted with black leather. The short, double-breasted coat is of black kid with four square pockets and wide revers, and is lined with the black-and-white cloth.

The Shepherd's Plaid.

An engaging little suit was made of woolen material in shepherd's plaid with jacket of bright red leather, lined with the plaid. Scotch plaids in the different tartans are seen a lot in the lining of these leather coats. One of black kid, made seven-eighths length, is stunning lined with a gay tartan. The fancy for leather is illustrated in leather trimmings, in bands and cut-out patterns to be applied as borders and plaques on cloth, as well as in the thousand and one fascinating accessories.

A picturesque model in a sports suit is that made of Scotch plaid. English

Jumper Dress That Is Hit of London Season in Sports Wear.

tailors know better than any others how to introduce the tartans in women's dress. They do it with precision and decorative effect. It is acknowledged to be a sentimental tribute to that much-loved Scotswoman, the duchess of York, whose popularity appears to have done much to stimulate interest in the Scotch fabrics. The tartans are used in wools, in silk, for a kilted skirt, a hat; as a lining, trimming, sash.

A parasol covered with Scotch plaid taffeta carried with an all-white semi-sports dress at the Eton-Harrow cricket match was most effective. Another uncommon costume had a kilted skirt of a MacKenzie tartan with soft white peasant blouse and a bolero of black velvet.

The conspicuous success of the London season in fashions is the two-piece jumper dress. It is the final word in style, comfort and utility. As Reville, past master of the art of sports dress of the conventional and refined type, presents the jumper dress it is done in a fine quality of wool, silk and wool, all silk or cotton jersey or stockinette. It consists of a simple skirt plain or kilted, and an overblouse of the same material, made with high neck and long sleeves, and is in all ways like any overblouse or slip-on sweater as we know it. Beige, bois de rose, tan and yellow are the popular shades used, with very few dark colors offered.

A real achievement of Reville is one of these jumper frocks especially designed for tennis. The wrap-around skirt ingeniously conceals a pair of trousers of the same material, made all in one with the costume, yet with perfect convenience and grace. A sash of silk, knotted at one side, gives an artistic touch.

Another, in yellow-and-tan stockinette, has a short, straight skirt, with overblouse giving a tailored appearance, open at the neck, with small revers and a cravat tie, and a pocket on each side below the belt. Of the short sleeve or sleeveless middy there is not a trace, and all of the jumper suits have long sleeves with snug wristband. The kilted skirt to be worn with separate jumper or sweater is very popular and has the virtue of being youthful.

Home of the Knitted Dress.

London is the home of the knitted dress and its shops this year offer a large and attractive assortment of knitted frocks, jackets, sweaters, accessories and occasional garments of more or less formality. The best are, of course, hand made, intensely interesting as examples of knitting and crocheting in artistic and sometimes elaborate patterns. It is evident that a revival of this type of dress will boom the knitting industry and give opportunity to many handworkers. Plain patterns are usual, but some of the more elaborate things are done in clever reproductions of the old patterns of the days when knitting was considered a gentle accomplishment.

In one of the most expensive original designs, narrow panels imitating the plaits of a Norfolk jacket are knitted in, one with the whole fabric of the dress, an astonishing bit of needlecraft.

Most Common Diseases

According to figures calculated by a leading life insurance company, the seven most common causes of death of persons over ten years of age in the United States are as follows: Heart disease, which heads the list among both men and women. Second, chronic nephritis for men and cerebral hemorrhage for women. Third comes cerebral hemorrhage for men and cancer for women. Fourth among men is cancer and among women chronic nephritis. Tuberculosis is fifth among both men and women. Lobar and broncho pneumonia are sixth and seventh among both sexes.

Birds Faster Than Trains

Wild birds are capable of attaining great speed in flight. There is on record a swallow that traveled at the rate of 106 miles an hour, and a homing pigeon commonly will go more than 60 miles an hour, it is said. Even a pelican has been known to make 50 miles an hour and a wild duck has been credited with 59 miles an hour.

The time is passed when the measure of the value of a memorial is quantity. I hope the time has come when that measure is quality. I care not whether the material be marble or granite, its future will be measured by the character of the design. It is quality that has preserved for us the finest examples in painting and sculpture. It is quality that will stamp our imprint upon cemeteries of the future. Simplicity, correct lines and proportions and proper ornamentation are the real fundamentals. A design that is right, material that is lasting, and perfect workmanship, spells success for the future of this industry and the beautification of the cemetery. Will you let me help you select the memorial for your lot. Call at show room. NO AGENTS.

Honor for King George

The appointment of King George to the rank of admiral in the Swedish fleet is considered one of the greatest honors Sweden can bestow. Although King George is qualified to hold a high post in the British navy, when other rulers have bestowed honorary rank upon him the army has always been selected hitherto. His majesty is thus, like his uncle, the duke of Connaught, the colonel of a crack Spanish infantry regiment and is also a field marshal of Japan. Sweden has never indulged freely in granting honorary positions in her navy to foreign monarchs, which makes the courtesy extended to his majesty a still greater compliment.—Family Herald.

Sewing Machine Exhibit

Through the co-operation of sewing machine manufacturers, the textiles and clothing division of the bureau of home economics of the Department of Agriculture has arranged for a permanent loan exhibit of the various types of home sewing machines now on the market. Forty-three machines are on display at present, including hand, foot and motor-driven models of all the types now purchasable. This exhibit, which is in the bureau of home economics building at Washington, gives the general public its first opportunity to study the various makes and models in one collection.

Lack of Tourists

Arouses the Irish

Dublin.—At the Rotary club in Dublin complaint was made that the tourist traffic, particularly from America, had not reached expectations this year. One member who had returned from America said he was humiliated there by the questions asked regarding Ireland, by the doubts expressed as to whether the country was safe for travelers, and by the impression that Ireland was in a backward state of civilization, "with pigs in the drawing room."

P. J. O'Brien, secretary of the Irish Tourist Development association, answering these statements, said that, while there had not been anything in the nature of an American invasion, the arrivals at Cobh totaled more than 1,000 a week, and the traffic between Ireland and England on one of the most important services was practically double what it was last year.

The transportation companies concerned were satisfied with both results and prospects.

In Ulster, the tourist traffic is reported in excess of previous years and in several districts has reached the pre-war standard.

PHOTOGRAPH AN
UNEXPLORED LAND

Capt. Stevens Takes First
Aerial Pictures of River
in Brazil.

New York.—Capt. A. W. Stevens, aerial photographer of Dr. A. Hamilton Rice's expedition to hitherto unexplored regions in the tropical jungle north of the Amazon river basin in Brazil, announced recently that he and Walter Hinton, the aviator, according to the New York Times recently, had discovered the source of the Parima river in the Parima mountains last month, and had photographed and mapped almost 1,000 miles of terrain, including 120 miles never before explored by white men.

Flying at an altitude of one mile above the Rio Branco, the Rio Uraricoera and the Rio Parima, and using a special high-altitude camera that can make a photographic record of a strip of land 120 miles long and one and one-half miles wide, Captain Stevens said he had taken the first aerial pictures ever made of these rivers and the surrounding country, and had made the first complete and accurate map of the country all the way from the City of Manaus, the base of the expedition, to the source of the Parima river.

Accompanied by James W. Swanson, radio expert of the Rice expedition, Captain Stevens arrived in New York on the steamship Polycarp. Captain Stevens told of his experiences in the office of the Fairchild Aerial Camera corporation, which makes the special army air-service camera which Captain Stevens used.

Left the Expedition Behind.

Captain Stevens said that he had left Hinton at Manaus and the rest of the expedition of 50 whites and natives, headed by Doctor Rice, several hundred miles farther from civilization on their way to the source of the Parima.

When the Rice expedition reaches the headwaters of the Parima, which it may have done by now, Captain Stevens went on, it may be confronted by the same tribe of cannibalistic Indians that attacked Doctor Rice and his party with poisoned arrows on the other side of the Parima mountains in 1920, and prevented the explorer's finding the source of the Orinoco river, which also rises in the Sierra Parima. It is hoped, however, that by this time the Indians, in the fashion of the Persian tribes in "Grass," may have made their annual pilgrimage across the mountains to the Orinoco side. Stevens and Hinton did not see the Indians at the source of the Parima, but did see clearings and other indications that one of their villages was near. In order to win their friendship for the other white men of the expedition, the aviators dropped red parachutes containing glass beads, pocket knives and other gifts.

Before his return to America Doctor Rice will complete his research at the source of the Parima into the ethnological and geological features of the hitherto unexplored region and its commercial possibilities. Captain Stevens said that the expedition already has learned many interesting facts about the customs of the friendly natives—full-blooded Indians who go about naked, eat raw food and are strict monogamists—and about fossilized skeletons discovered in the river basins.

Has Many Natural Resources.

When Doctor Rice returns, according to Captain Stevens, he expects to bring with him valuable information as to the possibilities of further development of the Amazon-Parima region for the sake of its rubber, gutta percha and other natural resources.

"The expedition has already shown," Captain Stevens went on, "that a white man can stand the same exposure in the tropics as the Indians when proper medical precautions are taken. Charles Bull, a former Harvard athlete and a classmate of Doctor Rice, traveled alone, except for an Indian crew, in a canoe ahead of the main body of the expedition for 700 miles. Naked as the Indians himself, he got to be nearly the same color as they, but at last reports he was standing the exposure to the tropical sun and rain in fine shape.

"Almost all the members of the expedition had tropical fever. All recovered except Doctor Koch-Grunberg, the German explorer, who died. Hinton suffered from the ordinary type of malaria, which is chronic and which bothered him all the time he was flying.

"Great credit is due to Hinton for piloting our seaplane in and out of many difficult situations during the 174 hours we were in the air between Manaus and the headwaters of the Parima, especially in view of his recurrent attacks of fever. We had to fly at more than 5,000 feet because of the heat.

Used Plane for Scouting.

"We used the plane as scout for the main expedition, sketching in the main streams and many tributaries, and for photography. The plane was of American make and stood nine months' constant exposure to tropical sun without shelter, and with the hull immersed in water a great part of the time.

"Bull followed us to establish gasoline stations. After making and photographing a certain stretch of river we would fly back with the pictures, which would be developed in order to guide Doctor Rice over that part of his journey."

Captain Stevens said he thought the

outstanding feature of the expedition was its success in wireless transmission from the jungle.

"Although working with portable apparatus and in the heart of the world's greatest forest," he said, "a record was made in exchanging the first wireless messages to pass directly from South America to England and back again. Long-wave communication was carried on between the expedition and Manaus and short-wave communication to many parts of the world, including New York, San Francisco, London, Rio Janeiro and New Zealand. The signals were reported as very strong, both in New York and London. Part of the apparatus was designed and assembled on the job by the operators, John W. Swanson and Thomas M. McCaleb.

"The antenna system was often erected by sawing down a number of large trees in the forest and stringing the wires between other tall trees on the edges of the roughly cleared space. A wire was usually strung from the folding table that held the instruments to a ground loop.

Curiosity Kills Cobra.

"On one occasion at night in the forest McCaleb, while transmitting, was startled to see a small cobra of a very poisonous species come crawling up this wire, attracted by the hum of the converter perhaps or by a small electric light. He waited until the snake pushed its head on the table and severed its neck with his pocket knife. Needless to say, the message suffered a marked interruption! Snakes were often seen in making camp, but always they moved away from men. A number of very large snakes were shot. It was almost unnecessary to take aim; the snake usually kept his head directly in front of the muzzle.

"The rivers were full of large fish, easily hooked or speared. A very common fish, the uiarnya, though usually not over a foot long, has teeth so sharp and jaws so powerful that it often severed three or four strands of copper wire with which each hook was attached to lines. Because of this fish swimming was not popular.

"The largest animal that furnished fresh meat was the danta or tapir, some of which were shot for food. Wild pigs, monkeys and smaller animals were fairly easy to get.

"The real owners of the Amazon basin," he continued, "are the ants—big, little, black, red, with stings and with wings. Weight or bulk considered, certain small stinging ants, though not dangerous, can produce more irritation than almost any other carrier of venom, while the bite of the larger ants is far more dreaded than that of the scorpion. Scorpions were plentiful, and many members of the expedition were stung by them but with little harmful effect. From getting several thousand assorted bites and stings and being frequently in warm river water one's blood suffers some change, so that it is necessary to watch stings, scratches or cuts carefully to prevent tropical ulcer. Almost all natives bear the marks of these ulcers."

A custom of the country, Captain Stevens said, was to tie the boys of fourteen to fifteen into a sack filled with stinging ants. Those who survived this test are recognized as having arrived at manhood's estate.

Captain Stevens said that the expedition lived largely on the native farina, or meal, and dried meats.

For Thanksgiving dinner Stevens and Hinton flew back down the Rio Branco to a settlement where they could get bacon and cheese, which had to substitute for turkey and cranberry sauce.

The Rice expedition left New York last March and went by steamer to Manaus, which is on the Rio Negro just north of its confluence with the Amazon. Two seaplanes which had been shipped from New York were assembled at Manaus in June.

The explorers followed the Negro to its confluence with the Branco, which they then followed until it ran into the Uraricoera. This they followed to its junction with the Parima, and this junction was as far as white men had previously gone. It was at the junction that Stevens and Hinton saw the last of the natives. For the 120 miles of unexplored land over which they next flew they saw no signs of life until they came to the clearings at the end.

Doctor Rice and his followers probably will have had some difficulty traveling over this 120-mile stretch, said Stevens, because of rapids and waterfalls. It will probably take the expedition weeks to cover the ground that he and Hinton flew over in a few hours, he added.

Captain Stevens said he and Hinton discovered the source of the Parima about 3 degrees north of the equator and 64 degrees west longitude, on March 9. This ended the aviators' work and they flew back to Manaus, where Hinton remained to take the planes apart and ship them back to New York.

Captain Stevens said that Doctor Rice will return to civilization early this summer unless he delays to investigate a recently discovered landslide, on another tributary of the Amazon, which has uncovered large fossilized skeletons.

Vandals Push Down
Tombstones in Cemetery

Kasota, Minn.—Twenty-eight monuments in the Kasota cemetery were pushed down during the night. Many of the stones are broken in several parts, entailing losses aggregating several thousands of dollars. A Bertillon expert has been dispatched by the Minneapolis police department to this city to take finger prints on the stones in an effort to trace the persons responsible for the destruction.

Withering Comment on
Result of World War

The Recorder sat in a tower on the wall of the Eternal city and thumbed an ancient book. The book contained the record of man's achievements.

The entries were surprisingly few. On the first yellow page were two words: "Fire discovered." The second entry, obviously made many centuries later, was equally terse: "The wheel discovered." It was evident that the Recorder took no notice of trifles and made entries only on those rare occasions when men took a step forward.

There was a brief note concerning the beginning of organized government, when men sacrificed personal liberty to win safety, and another to mark the beginning of democracy.

The discovery of printing received three lines.

The Recorder thumbed the pages of his book and yawned. And even as he yawned there was a great stir on the earth below and a war was in progress.

Nations girded themselves for the conflict and young men marched in

countless millions. Guns bellowed, gases crept along the ground, mighty ships were shattered. Orators denounced the evil that had been let loose in the world; idealists pictured a world free from human nature; valiant men died without whimpering because their cause seemed just. Cities were destroyed; children starved; fields lay idle.

And when the orgy of killing was over, men gathered up the shattered remains of the civilization they had been so long in building, taxed themselves to pay for their follies and wrote their memoirs.

The world was dotted with new graves; new prejudices formed. The maimed hobbled on every street.

The Recorder, leaning on a window sill, had watched the commotion with some show of eagerness. Apparently he had hopes.

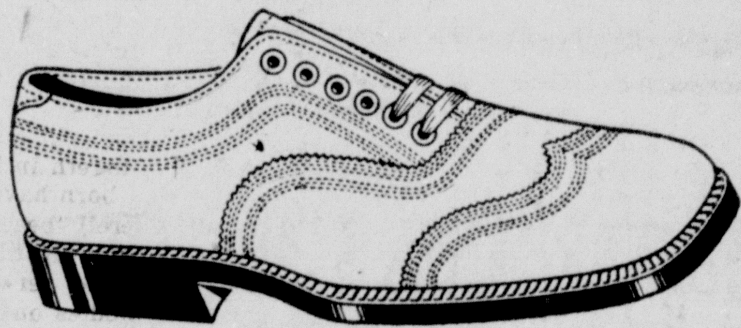

But when the world had returned to its accustomed way he yawned and closed his book.

A messenger appeared at the door with a question.

"Tell him," said the Recorder, "that nothing has happened."—Baltimore Sun.

Well to Inculcate

Pride in Ancestry

It is urged in defense of the lowly and in disparagement of the well born that a man cannot select his ancestors, but as a matter of fact a man frequently does.

Take the case of the man whose great-great-grandfather was a noted general. This man had two grandfathers, four great-grandfathers, eight great-great-grandfathers and 16 great-great-great-grandfathers, of whom the general was one. Each of the 16 had a wife, so that the man's cosmos contains but one thirty-second part of the general. When blood gets so thin it leaves little trace, and yet this man selects the general as his ancestor and says nothing of the others.

The reason is obvious. The others were nobodies. We have, then, a man who is one part general and 31 parts nobody; and yet in many ways he seems to be the general come to life again. He has the general's pride and manners and love of decency.

At first glance this seems a puzzle, but the solution is simple.

The general, being the one ancestor that family pride cares to remember, has been talked about and presented to children as a model for many generations. The gentleman is like the general because the general was used as a pattern in shaping his life.

The general's pride that he seems to inherit is not an inheritance. It is a homegrown pride, based on the fact of the general. The man says to himself: "I am descended from a general; that's who I am." Wherefore he carries his head high and looks the world in the face. But if there was no blood connection, and the man merely thought there was, his pride would be no less.

Which brings us at last to the point: "As a man thinketh in his heart, so is he." The well born have a tremendous advantage merely because they have something to live up to. And parents render a genuine service when they forget the nobodies on the family tree and preserve the few somebodies to inspire the kids. An ancestor is worth while if he can stiffen the backbone of a modern who might not be worth a whoop without family pride to keep him decent and set him a mark.—Baltimore Sun.

Fast Travel to India

All-steel airplanes now under construction in London will make the trip from England to India, roughly 8,000 miles as the crow would fly, if he were able to accomplish it, in three days and some odd hours, according to recent announcement of the British air ministry under whose supervision the machines are being built. The specifications provide that the planes be equipped with three motors developing 2,000 horse power, and it is hoped they will be able to accomplish 100 miles an hour and possibly even a greater speed. A crew of four or five will operate each machine, which will carry 20 to 25 passengers. It is proposed that these giants of the air travel day and night, there being sleeping accommodations, and hot meals by means of an electric cooker.

Praises American Charity

The adoption of modern farm machinery in Mesopotamian wheat fields, where sickles and flails were in vogue only a year ago, is only one of many evidences of the Americanization of Bible lands, according to Dr. Isaac Yonan, a native Assyrian who won the title of the "Hoover of Persia" for his food economy campaign in that country during the amnistie period.

Doctor Yonan, in a report to the International Near East association, says that American agricultural methods as taught in the farm schools of the Near East relief during the past few years have begun to show results all over Armenia, Greece and Syria. "American charity has been a social and educational force of tremendous power in these countries," he declares.

Unsolved Mystery

"As I was coming back from Chick-atanzay," in the crossroads store related Gap Johnson of Rumpus Ridge, I seed an old feller with a gun across his lap sitting on a specially big post in a wire fence. When I came along he just looked me over like a body does a shoat he aims to buy, and then without saying anything he glanced away and along the road I'd just come over."

"What was his notion in acting that a-way?" asked the proprietor of the emporium.

"I hain't the least ldy in the world. He didn't 'pear to be the kind of a gent that I wanted to pry into his business."—Kansas City Star.

Electricity and Growth

Tests with 1,000-watt electric lamps at the Cambridge (Mass.) Electric Light company have shown astonishing results in the growth of grass by artificial light, says the Popular Science Monthly. Dr. Andreas F. Christian of Boston claims that bald heads may be covered, beards coaxed on clean-shaven faces, and bobbed hair grown long in a short time, by use of strong artificial light. The only requisite in the cases of both lawns and heads, he says, is that the germ of life must exist.

American Woman Honored

Mrs. Helen S. Wright of Pittsfield, Mass., has been elected a fellow in the Royal Geographic society of London, an honor regarded as the highest in its field, in recognition of her writings and research on Arctic and Antarctic exploration and history.

BLAMES CUSTER FOR MASSACRE

Veteran of Little Big Horn Declares General Disobeyed Orders.

Spokane, Wash.—Nick Imo, a veteran of the battle of Little Big Horn, June 25, 1876, holds that the massacre of Custer's command by Sioux Indians was due to disobedience of orders and "poor judgment" on the part of General Custer and not to the failure of General Reno to reach him in time with reinforcements. Mr. Imo, who served eight years in the United States army, is now seventy-six, and a resident of this city.

"Reno has been blamed for being lax, cowardly, dilatory and everything else," Mr. Imo said, "but it was impossible for Reno to reach the scene of conflict in time to participate. Custer himself was breaking an understanding that the pitched battle was to be June 26. He fought it a day earlier, before either the detachment of troops under Reno or Colonel Gibbons could come up, and lost."

Met Custer at River.

"I remember that we met Custer June 22, 1876, on the Yellowstone river, opposite the mouth of the Rosebud. We had just come from Fort Ellis and were camped on the north side when Custer, riding from Fort Lincoln, showed up on the south. That same day he received orders from General Terry to proceed up the Rosebud toward the Indian camp. The orders specified that the final engagement was to take place June 26, when all forces would concentrate on the camp."

"My detachment, under Colonel Gibbons, crossed the Yellowstone below the mouth of the Big Horn, June 24, and camped on the east side of the Big Horn. L troop, under Captain Tyler, which was in advance of Gibbons' command, was fired upon by the redskins, and returned to report. We camped on the Little Big Horn, June 25, just ten miles from the Indian camp, all ready for the battle, scheduled for June 26."

"My troop, under Capt. Edward Ball, was sent on in advance next day, with Captain Tyler on the right and Lieutenant Bradley on the left. To Bradley goes the distinction of first discovering the bodies of Custer and his slaughtered troops."

Indians Took Uniforms.

"I reconnoitered with Captain Ball and Bugler Kerney, about fifty yards in advance of the troop, and we came on twenty-four ponies and seven dead Indians, scattered about a couple of tepees. We also encountered a scouting party from Major Reno's detachment, out looking for Custer's band, and sent them on to Gibbons' camp to report our find. We returned to camp after a ten-mile scouting trip."

"There we learned of Custer's death. Immediately after that the hills around seemed covered with detachments of United States' soldiers, marching in curious disarray. It was the Indians, wearing uniforms stolen from the bodies of their victims."

Women Give Girl Coat of Paint and Feathers

Shreveport, La.—Reports reached here recently of an attack by a mob of infuriated women on Miss May Simms, in the yard of a lumber company mill at Eros, Jackson parish. The woman was stripped of most of her clothing in the presence of 150 or more persons, a coat of paint and feathers applied, and she was warned to leave town, the report states.

This is the second reported attack on Miss Simms within two weeks, the first having occurred when she was chased into the swamps near the mill and warned not to return to the camp. Women who participated in the affair charged her with improper relations with men employed at the mill, it was said.

Town Marshall Davis of Eros stated he had received reports of the attack, but that no charges have been filed. No information concerning the present whereabouts of the victim could be obtained.

Old Cannon, Gold, Rum, Ship Dug Up in New York

New York.—Two ancient Dutch ships, rum bottles, coins, including a piece of eight bearing the date 1761 and a three-foot culverin with 17 cannonballs have been unearthed in the excavations for the new Seamen's church institute on South street along the lower East river front.

A forty-foot oak-built sloop held together by wooden pegs was uncovered recently. It was so rotted that it broke up quickly. A similar ship was accidentally demolished before workmen were aware that they were digging in a treasure trove of old New York.

The rum bottles are of fine old Dutch glass. The cannon has a bell muzzle with a two and a half inch bore. Other finds include powder horns, anchors, pigs of iron casting bearing date of 1757, and olive jars. The curios will be housed in the new institute.

Unique Violin

Midland, Md.—John Shields, known as "the greatest whittler in western Maryland," has just added to his large collection of curios a violin of standard size, made of matches. He was more than a year completing this rare instrument.

SOCIAL CALENDAR

The second annual reunion of the Barthelmas-Wardell families was held at the home of Mr. and Mrs. John Barthelmas, east of Circleville, on Sunday, September 6. The forenoon was spent in music and games. At noon one hundred and twenty-three guests partook of the sumptuous food which had been prepared.

After dinner the following program was given:

Music—Orchestra — White's Melody Lads
Vocal Duet Vera Walters and Mildred Barthelmas
Music Orchestra
Vocal Solo Mrs. George Himrod
Music Orchestra

Following the program the business meeting was held. The officers for 1926 are: President, Bertha Krimmel, vice president, Edna Wardell; secretary, Kathryn Barthelmas; treasurer, Edward Wardell.

Business committee—Thomas Wardell, George Wardell and Charles Krimmel.

The families enjoyed very much the music furnished by the orchestra known as White's Melody Lads, of Columbus. This orchestra is a very good one. Miss Kathryn Barthelmas, daughter of Mr. Frank Barthelmas, is a member of the orchestra and it was thru her efforts that the guests were entertained with such good music.

The host and hostess were thanked for their kind hospitality. The guests departed in the evening hoping to meet again on the first Sunday of September, 1926, at the home of Mr. and Mrs. Thomas Wardell.

Miss Dorothy Willis, daughter of Mrs. LeRoy Willis, of Delaware, Ohio, and Mr. George Blodgett Rector, of Williamsport, were married at 6 o'clock Saturday evening, September 12, at the home of Mr. and Mrs. R. K. Willis 112 North Washington street, Delaware.

The home was beautifully decorated with smilax vines, Jacques roses and wine colored carnations, fraternity and sorority flowers and was illuminated with a magnificent array of candles set in elaborate candelabrams. Fraternity and sorority colors, wine, silver blue, red and green, were profusely used in floral and lighting decorations.

A musical program was given before the ceremony by Miss Martha Rukenbrod, of East Palestine, Ohio. While the wedding march was played by Miss Rukenbrod, the ushers, Mr. James M. Smith, of Williamsport and Mr. Rufus Short, of Columbus, preceded the wedding party, forming an aisle with silver blue ribbon and escorting the groom and best man, Mr. Nelson Vigor, of Marion, to the altar.

The bridesmaids, Miss Gwendolyn Rector, of Williamsport, and Miss Grace Hooper, of Akron, followed by the maid of honor, Miss Margaret Taggart, of Delaware, escorted the beautiful bride to the altar, accompanied by her grandfather, Mr. R. K. Willis, who gave her away. The aisle was strewn with flowers by little Miss Arvonnia Watkins. The impressive ring ceremony was read by Rev. Thomas F. Watkins, pastor of the Presbyterian church, Delaware.

The bride was gown in white georgette with panels of chantilly lace. The maid of honor wore rose georgette. Miss Rector was gown in cyclamen georgette and Miss Hooper in a pastel shade of yellow georgette. After the ceremony a dinner was served. Seated at the bride's table with the wedding party were Mr. R. K. Willis and Mrs. LeRoy Willis, Mr. and Mrs. Edward C. Rector, Rev. and Mrs. Thomas F. Watkins, Mr. and Mrs. Joy Crum, Dayton, cousins of the bride, who had been married earlier in the day at Dayton.

Other out of town guests present were Mr. and Mrs. Dwight Rector, of Circleville; Mrs. Belle T. Rector and Robert Rector of Williamsport; Mr. and Mrs. C. D. Lehman, of Worthington; Mr. and Mrs. William Oldham Columbus; Mr. and Mrs. Ira Metzger Frankfort; Mrs. Barbara Stout, Miss Mary Stout, Columbus; Miss Josephine Saylor, Tiffin; Miss Evelyn Low, Pittsburgh, Pennsylvania; Miss Eleanor Jones, Washington C. H.; Mr. James Bruce and Richard Anderson, Portsmouth; Mr. Roy Ernest, Cochocton; Mr. Charles E. Bodurtha, New York City.

Mr. Rector is a son of Mr. and Mrs. Edward C. Rector, of Williamsport, a graduate of Williamsport high school and formerly a student at Ohio Wesleyan university. For the past three years he has been a state examiner from the office of State Auditor Tracey. He is a member of Phi Kappa Psi fraternity.

Mrs. Rector is a daughter of Mr. and Mrs. LeRoy Willis, formerly of Lewis Center, Ohio. Mr. Willis died two years ago in Delaware. She is a graduate of Delaware high school and Ohio Wesleyan university and for the past two years she has been an instructor in the Delaware high school. She is a member of Sigma Delta Pi, a local sorority, whose charter in Phi Beta Phi is to be installed in October. She is also a member of Phi Beta Kappa Scholarship fraternity.

After October 1, Mr. and Mrs. Rector will be at home at 170 North Franklin street, Delaware, Ohio.

John Alden Home Rich in Historic Interest

New England is still rich in the old landmarks and homes of pioneer settlers. One does not have to go far from New York to come across these ancient monuments and habitations. Situated close to the South Shore tracks and a short walk from the Duxbury station stands the house that was the home of the girl for whom the big Fall river steamer Priscilla was named and of her husband, John Alden.

"Leaving the Duxbury station going toward Plymouth," says the New York Times, "the house is on the left-hand side of the train and can be plainly seen from the car windows. It is undoubtedly one of the most historic houses in America. While it is very properly called the John Alden house, it was actually built by his son, Jonathan Alden, in 1653."

"The old house is well worth a visit. Entering at the front door, the 'great room' is on the right and the parlor on the left. The great room and, in fact, all the rooms are filled with fine and rare old-fashioned furniture. Across the ceiling of the great room can be seen the immense beams used in the construction of early colonial houses and the wrought-iron 'H' hinges to the closet doors. In the great room also are two rare engravings by John Jones, London, valued at \$500 each."

"There is also a punchbowl 225 years old, some rare and beautiful glassware and some Lowestoft ware, including a rare helmet pitcher; a beautiful secretary with a secret drawer also adorns this room, as well as a small table actually used by John Alden and Priscilla. In the kitchen is the huge open fireplace with a capacity for four-foot logs; also a brick oven and the usual assortment of utensils in connection therewith; sets of wooden and pewter ware and much rare china. Off the kitchen is a small room in which both John Alden and Priscilla died."

The Material

"I am naturally romantic. Yet all my life I have had to think of the material, always the material."

"How is that, madam?"

"I'm a dressmaker."—Louisville Courier-Journal.

At It Long Enough

Dauber (showing pictures)—Don't you think it is about time I exhibited something?

Candid Friend—Yes, a little talent.

AMUSEMENTS

The frenzied search of a debutante flapper for a new thrill and the adventures, dramatic and comic, which befall her, is the basis of Robert G. Vignola's Metro-Goldwyn-Mayer production, "The Way of a Girl" which comes to the Met theater today.

The story is adapted from the novel "The Summons," by Katherine Newlin Burt, and has been told by its director and the players so as to feature the humorous side.

Eleanor Boardman, who has appeared lately in "Wife of the Centaur," "So This is Marriage" and "Sinners in Silk," plays the leading role, her first attempt at light comedy on the screen.

She is supported by Matt Moore, as her conservative suitor, William Russell in an unusual good-bad man role, and Mathew Betz, the latter a new addition to screen villainy.

The central character of the story races from prize fights to jails, to artists' balls and fast automobiles for her desired thrills, and the dramatic climax of the story provides her more of a thrill than she had sought.

Part of the white man's burden consists in acting white while dealing with the yellows.

Had Things Mixed

A city man called upon another and, after a glance around the establishment, inquired:

"How's your new office boy getting along?"

"Fine!" was the reply. "He's got things so mixed up that I can't get along without him."

Little Fun for Himself

"Well, Vaughn, how's your sweet heart?"

"We're not friends any more."

"Well, you're going to make up, aren't you?"

"Sure, but I'm going to play insulted for about a week, and spend some of my money on myself."—Montreal Gazette.

Use Soy Bean Oil Meal for Poultry**New Feed Could Well Be Fed to Greater Extent Than at Present.**

(Prepared by the United States Department of Agriculture.)

With the rapid expansion of soybean culture in the Corn Belt states farmers of that region have at their disposal a new poultry feed which could well be used to much greater extent than is being done at present, says the United States Department of Agriculture. Poultrymen in the Pacific Coast states have used soybean oil meal for several years and consider it a most excellent feed for growth and egg production.

Feed Value of Meal.

A number of feeding tests at various experiment stations have shown the value of soybean oil meal as a poultry feed. At the North Carolina station it was found that when fed in equal quantities with wheat shorts and cracked corn mixed with sweet milk soybean oil meal proved to be a most valuable feed and one to be recommended as a good ration for feeding to little chicks. One lot of chicks on soybean oil meal averaged 1.4 pounds when eight weeks old. From these tests it was concluded that the soybean oil meal could replace rolled oats in chick feeding.

Another series of experiments showed that soybean oil meal with a suitable mineral mixture is a better supplement to corn meal than meat scraps and is nearly as good as condensed buttermilk when fed to chickens for short-time intensive-feeding periods. A simple mineral mixture composed of bone ash, limestone and salt was used. To be most effective, the amount of mineral mixture to be added should be about 2 per cent of the ration.

Add Mineral Mixtures.

The addition of the mineral mixture is necessary to prevent too great a growth of fat at the expense of protein growth. Hens responded in these tests to the use of the mineral mixture in a similar manner to that of young, growing birds. The mineral mixture, it has been shown, increases the value of the soybean oil meal as a protein supplement for growth and egg production more than 40 per cent.

A good mineral mixture is made of 60 parts bone phosphate, 20 parts salt, and 20 parts of limestone.

Vaccinate to Prevent Hog Cholera Outbreak

Warnings against a possible serious outbreak of hog cholera this year were given out recently from three states. With the hog market definitely pointed in the direction of profits, this seems like a poor time to take chances on losing the hog crop to save a few dollars.

F. A. Zimmer, state veterinarian of Ohio, points to the fact that hog cholera runs in cycles and that it is due this year. About the time the hog raiser concluded in other years that the disease was disappearing, it has reappeared in acute form to take a toll of millions of dollars.

Dr. R. A. Craig of the veterinary department at the Indiana Agricultural college believes that a large corn crop and a good price for hogs will bring about a heavy movement of feeder hogs and cholera infection will become widely scattered. Furthermore, because of low prices, few hogs were immunized during the past two years, thus adding to the amount of material for cholera to work upon. Threshing gangs and visitors during the fall are largely responsible for spreading the disease from local areas because people do not practice what they know about the control of infectious diseases.

Vaccination is now generally recognized as the reliable method of preventing cholera when properly administered. While hundreds of farmers are vaccinating their own hogs successfully, there are many advantages in employing a skilled, established veterinarian who is known to be reliable and who will do his work for a reasonable price. At any rate, avoid the drifter who offers to do the job cheaply, but seldom is ever heard from again.

Silage and Fodder Made by Stacking Green Corn

Another form of silage may be made by stacking the bundles of green corn which have been cut about 20 feet in diameter and 20 feet high. The bundles should be distributed evenly over the surface with the butts laid to the outside. This will keep the outside higher than the center so that it will be necessary to fill in the center before the stack is completed. Thorough tramping will be beneficial. About eight inches around the outside of the stack will spoil but as only the butts of the stalks are affected by this, the loss is not serious. The top of the stack should be kept covered with a foot or two of straw or hay during the winter to reduce spoilage.

According to the Minnesota experimental station, stack silage cures somewhat differently from ordinary silage and has a sweet molasses odor and flavor which makes it palatable to all kinds of live stock. The results obtained with stack silage, however, have not always been satisfactory. The method is only suggested here as a possibility. Under many, if not most, conditions it would seem that handling the immature corn as fodder would be safer.

New Railroad Connects South American Countries

Washington.—Recent completion of a 124-mile railroad line connecting Bolivia and Argentina was hailed in a statement by the National Geographic society as bringing "the long-cherished dream of uniting the republics of North and South America with bonds of steel another step nearer realization."

In addition to providing a new outlet for Bolivia, which has no sea-coast, the new line connects with the railway systems of Argentina at its southern terminal and through them, with the lines of Uruguay and Brazil, while at Atocha it is possible to make connections with Pacific coast ports and to continue as far north as Cuzco, Peru.

"More than half of the 10,211 miles separating Washington and Buenos Aires have already been 'paved with steel,'" the statement said.

Tree Preservatives Kill Bees

Werder, Germany.—Millions of bees in the Werder district have been killed supposedly from chemicals sprinkled upon fruit trees. Only the insects that were near the orchards died.

**A System of Farming That Brings Health and Prosperity**

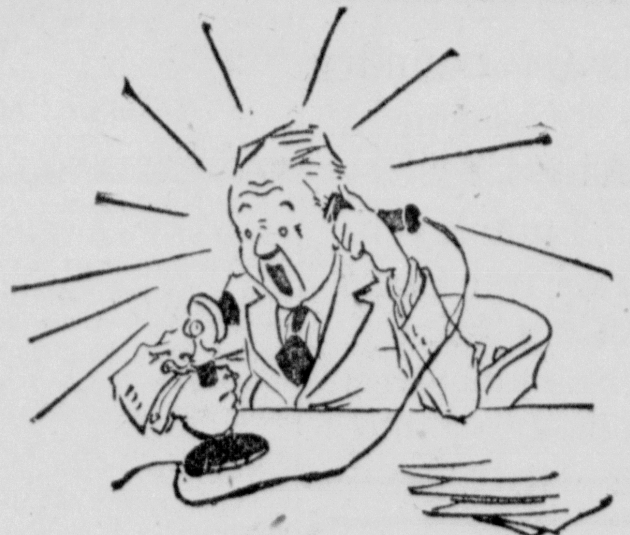

Every farm, regardless of the method of farming practiced or of the crops raised, should have at least a few good milch cows to provide

- (1) Enough milk, cream and butter for home use;
- (2) Enough skim-milk to raise some calves, pigs and chickens;
- (3) Enough cream or butter to sell to pay, in part or entirely, current living expenses.

This plan has been a "life-saver" for thousands of farmers, especially during the hard times of the past two years. It insures a living, at least, and often other income besides.

Such a plan pays best with a De Laval Cream Separator. It soon pays for itself—and skims cleaner, lasts longer and is easier to operate and clean than any other.

What Seemed Humorous

Mother was entertaining a caller, when suddenly Dorothy, who had been playing on the floor, yawned prodigiously. "My, what a big yawn for such a little girl!" exclaimed the caller. "Yes," agreed Dorothy, "and the funny part is that I wasn't listening at all to what you were saying!"

How to Live Long

Longevity is largely a matter of selecting a spouse who isn't jealous.—Birmingham News.

SHORT STORIES OF THE BUCKEYE STATE

An Inaugural Bail 51 Years Ago.

G. A. Halm, 397½ South High street, has preserved a copy of the program of the inaugural ball given at the city hall on the evening of Jan. 12, 1874, the governor inaugurated that day being William Allen. The managers were John G. Thompson, A. J. Mack, Samuel Thompson, E. T. Hall, John G. Reinhard, James Naughton, Richard Nevin, Samuel Shaffer, James W. Newman, Frank H. Hurd, James T. Irvine, Sam F. Hunt, John A. Cockerill, John H. Putnam, R. C. McCloud, W. W. Armstrong, A. T. Walling, N. Schleich, William Bell, Jr., John G. Doren, S. K. Donavin.

Col. J. O'B. Renick was chairman of the floor committee and had the following three-section committee under him: To serve from 9 to 11, W. B. Hayden, A. Mayo, R. H. Koehler, G. F. O'Harra, R. E. Reese, W. W. Medary, Frank Huntington, J. H. Outhwaite, Allen T. Brinsmade, J. C. Lough, Henry Heinmiller, W. D. Hill, Wm. E. Horn, J. McLean Smith, Amos Eberly and H. T. Van Fleet. From 11 to 1 a. m., I. B. Potts, E. F. Poppleton, A. D. Peffer, Waldemar Otis, George Cole, Charles Mumaugh, Dennis Kelly, Glenn Taylor, W. B. Dodds, Jr., J. C. Donaldson, William L. Brown, William H. Paul, J. S. Nelson, George J. Lang, Dr. Thomas Patton and Samuel Bradford. From 1 to 3 a. m., J. H. Cushing, A. J. Beach, George K. Nash, John W. Morris, Dr. Thomas R. Sparrow, George W. Bachman, Henry Gundersheimer, James Finnigan, Adolph Theobald, Charles F. Krimmel, E. S. Wallace, Frank W. Merriek, Edward Keefe, J. E. Parsons and S. M. Smith. It will be noted that they made a night of it.

On the dance program were waltzes, schottisches, gallops, polkas, quadrilles and lancers. The overture was an inauguration march, "Rise Up, William Allen," composed for the occasion by Hermann Eckhardt. The only name of a person still living in the above long list is that of Henry Heinmiller.

Mr. Halm's program still bears the names of Miss Smith, Miss Bortle, Miss Arms, Mrs. Shaffer, Miss Hoster, Miss Gibson, Mrs. Nevin, Miss Beck, Miss Jones, Miss McDonald, Miss Moore and Miss Adams written upon it, but he admitted that after the passage of 51 years his memory is not clear as to just who these dance partners of his were on the noted occasion. What dignified matron of today recognizes herself in these entries?—J. H. Galbraith in Columbus Dispatch.

EFFICIENCY MEETING

Bluefield, W. Va., Sept. 10.—Efficient railroad service and the part that the railroad employee plays in rendering such service held the attention of more than 300 Norfolk & Western Railway Company officers and employees assembled in the City Auditorium here today. In addition approximately 100 shippers and civic representatives were present as the railroad's guests. The meeting is the sixth of the road's Annual System Efficiency Meetings and brings together Norfolk & Western employees from every department and every part of the line from Norfolk to Cincinnati and Columbus.

Among those attending this year's meeting was H. L. Bartholomew, yard clerk, this city.

Toad's Great Value

Some form of toad can be found in each state. Toads were formerly more numerous. They are now becoming rare, for they are destroyed by all classes of vertebrates and by drought in summer and severe cold in winter. Their value to man lies in the number of insects and other invertebrates which they eat.

TIME ENOUGH

The impatient diner sent for the manager of the restaurant. "See here!" he exclaimed. "I ordered cold roast beef 30 minutes ago and I haven't got it yet."

"How long ago?"

"Thirty minutes."

"Good gracious, I'll have to see about that. It should be cold by this time."

More of Nature

Mr. Bacon—Did you hear those measly roosters crowing this morning early?

Mrs. Bacon—Yes, dear.

Mr. Bacon—I wonder what on earth they want to do that for?

Mrs. Bacon—Why, don't you remember, dear, you got up one morning early and you crowed about it for a week.—Watchword.

Nearly Bankrupt Two Ways

"So you lent Harbinger the money, did you?"

"Yes."

"What did he say?"

"He promised to pay with alacrity."

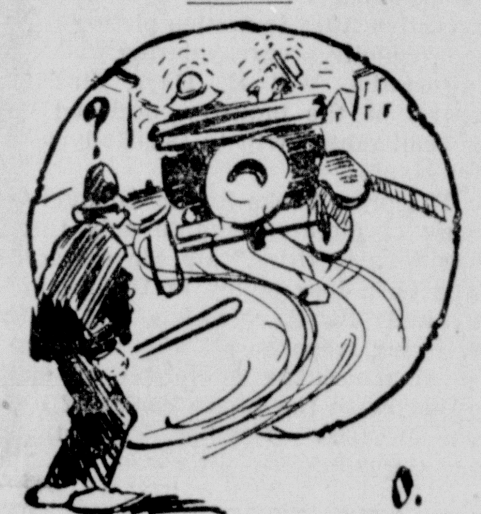

"He did, eh? Well, let me tell you this: If there's one thing that's scarier with him than money, it's alacrity."

Amenities

Peaved Young Wife—I don't care! I only married you because your hair waved the same as Jack Harlow's.

Jolted Husband—Is that so? Well, I only married you because you used the same flavor lipstick as Madge Morton.

FROM CLOSE SHAVES

Give and Take

Some of us lose, some of us make, But be we losers, be we makers, Life is a game of give and take, With odds in favor of the takers.

All in Vain

"Have you anything to say why sentence should not be passed on you?" asked the judge.

"Not a word. I made speeches the last three times I was convicted, and they didn't seem to do me any good," replied the prisoner.—Heart of Home.

No More for Him

"Any inquiries?" asked the washing machine agent.

"Lady on Umsteenth street wants a demonstration."

"Let her tell it to somebody else. I did her washing last week."

Safe So Far

Squire's Daughter—I hear your youngest son is going to be married. I hope he will be lucky.

Giles—Well, I don't see why not. He came through the war without a scratch.—Stray Stories.

HE WAS RATTLED

Friend (who has dropped in)—What's the matter, Jim? You seem to be rattled.

Jim—Do I? Well, we've just had a big shake-up in this office, you see.

Lost of Grandpa

Grandpa in a motor car Pushed the lever back too far. Twinkle, twinkle, little star, (Music by the G. A. R.)

In Style

Mrs. Wag—This magazine says a formal dinner is incomplete without nuts.

Wag—Well, my dear, you always invite some to yours.

His Point of View

She—I was thinking, Aubrey, of the blissful days of our honeymooning.

He—Oh, yes—the blissful days.

THOUSANDS OF PEARLS IN BURIAL

Find is Called "The Great Pearl Burial" by Prof. Harry C. Shetrone—Nose Piece, Helmet, Tusks, Carved Tortoise, Found—Art Shows Sophisticated Knowledge of the Beautiful—Detailed Interview.

Chillicothe, Sept. 11.—Strewn with thousands upon thousands of fresh water pearls, taken from Ohio and Mid-west streams forgotten centuries ago by Mound-builders, four skeletons in "The Great Pearl Burial" were uncovered in their entirety by Prof. H. C. Shetrone, Ohio museum curator and his staff of archeologists Thursday afternoon, when another cut was made into the huge Pricer mound of the Seip mound near Bainbridge, west of this city.

The countless thousands of pearls, in the main prepared for stringing, were of all sizes some of them being as large as a hazel nut. In addition to these were copper and silver ornaments, copper helmets and a copper piece that had been inlaid in the nose of one warrior. The feet of the four burials uncovered Thursday were brought to light several days ago, and some rich finds were expected.

In an official statement to newspapermen Thursday, Prof. Shetrone said:

"It is a burial of four Mound-builders, the bodies laid side by side, covered over by a log structure or charnel house and this in turn covered over with a canopy fastened down with bone skewers.

"As to the skeletons, they appear to be those of adults, but as yet we cannot determine the sex. They must have represented a family group, or else were prominent personages of the tribe, judging from the preparations, the evidence of ceremonies and the extraordinary profusion of pearls. It may have been the burial of a royal family.

"The pearls are the most beautiful collection I have ever seen."

Prof. C. W. Mills, Columbus, prominent and nationally known archeologist, was present as was Gerard Fowke, who stayed over several days to see the skeletons exposed in their entirety. Prof. Mills says that he expects to find

the mound full of such burials. Only a fourth of the mound has been pierced. When the work was completed, Thursday, the bones were covered with a tarpaulin and a sentry was placed to guard the ancient sepulchre.

Harry Goodwin, registrar of the Ohio museum, was on the field today.

Why They Chuckled

Smith had been troubled by his neighbor's hens. One day he was looking at them over the fence when he inquired, "By the way, Jones, what did you pay for those fowls?" "A dollar apiece," replied Brown. "Ah, that explains it," said Smith. "I wondered what the things had to chuckle about."

Length and Age

The Great Wall of China is the longest but not the oldest wall in the world. It was built about 214 B. C., but the walls of Jericho were built fifteen hundred years before the birth of Christ, and are thus about 3,500 years old.

FOR TRADE FOR GROCERY OR RESIDENCE.

SAVE THEM

Circleville, Ohio, R. F. D. 1, Aug. 26, 1924. MR. F. L. FICKARDT: All spring I have been having trouble with my flock, both young and old. During July I lost about 100. Quite a number had LIMBER NECK or PTOMAINIE. About August 1st, I began use of your DROPS, and I can say the results fully justified your statements. One case of Limber-Neck was too sick to take the medicine. I gave it some with a dropper, thinking then it a waste of time, but the next morning it was still around and finally got well. The rest of my flock straightened out and are doing well now. Sincerely, MRS. LUCY HONNOLD, Celina, Ohio, R. F. D. 4, June 19, 1925.

F. L. FICKARDT:

Dear Sir:—Find enclosed one dollar for which send me Fickardt's Roup and Cholera Drops.

I used one package and it helped my chickens and cured them of cholera.

I thank you, Mrs. L. P. Lenhart.

P. S.—Send as soon as possible, a neighbor wants some of it for her chickens are sick.

FICKARDT'S ROUP AND CHOLERA DROPS is a remedy for Roup, Colds, Sneezing, Limber-neck, White Diarrhea and Bowel Disorders. Price 50c. Tablets by mail. Liquid from F. L. FICKARDT, Circleville, Ohio.

For those who go to College and those who don't

Correctly dressed young men, on college campus or at home here in town, are now wearing coats and trousers of contrasting shades.

This means separate trousers. And separate trousers invariably mean Dutchess Trousers, if you are looking for style, fit, comfort and long wear. Dutchess Knickers, too—for golf, motoring, hiking, or just plain "roughing it".

With our complete line of Dutchess Trousers and Knickers, in a variety of pleasing patterns and durable fabrics, we can fit you perfectly and satisfy you completely.

And besides, they're all backed by that famous, money-on-the-spot Dutchess Warranty—10¢ a Button; \$1.00 a Rip.

ROOSEVELT HUNTERS PLAN TRIP TO CHINA

Quest of Rare Animals in Asia May Extend Tour.

Amritsar, India.—The Roosevelt expedition in quest of rare animals of the mountains and jungles of Asia, had not decided when it passed through Kashmir on its way to the Pamirs, by just what route it would return or how long its trip would last.

There was some prospect, it was said, that the tour might be extended to January and that it was possible the expedition might be continued into China and not return to India.

The expedition, including Col. Theodore Roosevelt, Kermit Roosevelt, George Cherrie and Mr. Cutting, a cinema operator, made the first part of its trip into India without incident. The members traveled over the well-known route from Srinagar to Leh and Ladakh.

There is abundant game in that section of the country, but the expedition was interested in getting the ovis poli on the lofty heights of the Pamirs and the long-haired tiger in the Thianshan mountains of Chinese Turkestan.

Ovis Poli Hard to Shoot.

The ovis poli, or Pamir sheep, is not so rare as some may think, but as it habitates the high part of the Pamir range, the shooting of it is made difficult. This animal is the largest of the sheep family and sometimes weighs 300 pounds. Its head is beautified by its horns, each of which grows into a spiral form, five or six feet around the curve. The long-haired tiger found in the Chinese Turkestan regions often grows to a length of 12 feet.

The Roosevelt party went to Rawalpindi by train in the blazing heat of May when the thermometer registered 115 degrees in the shade. From Rawalpindi the party went by automobile 202 miles up and down the mountainside.

The travelers, while in the Kashmir valley, were guests of Sir and Lady John B. Wood, but they remained only sufficiently long for their transport arrangements to be made.

Made Haste to Avoid Cholera.

Their haste in getting away was due to the fact that this year there is a cholera epidemic of more than ordinary proportions. Deaths have been occurring at the rate of 1,500 to 1,700 a week since.

In the preparation of their equipment Colonel Roosevelt and his associates were ably assisted while in Kashmir by Maj. A. J. Hinde, assistant resident of Kashmir and British joint commissioner of Ladakh. In the

transportation of their equipment and supplies coolies and yaks were used during the first stages of the journey throughout the Leh regions. Coolies are hired for 24 cents a day and ponies for 30 cents a day as far as Leh.

During the first 100 miles to Leh the expedition met Reverend and Mrs. Heber of the Moravian mission; Mr. and Mrs. Owen Jones of Chicago, and Maj. George Van B. Gillan, consul-general at Kashgar, who represents the American as well as British interests.

Obtain Passports From Peking.

In order to go into Chinese Turkestan the Roosevelt expedition was obliged to obtain permits from the Peking government, which enabled them to enter territory which is truly a sportsman's paradise and very little traveled by white people.

Only 12 passes a year are given to travelers to visit Leh and Ladakh, six for the first half and six for the latter half, this being necessary because of food problems, much of the food having to be taken from Srinagar.

In addition to their interest in the hunting for rare animals members of the expedition always were confronted with food problems and some of them, especially Kermit Roosevelt, took every opportunity to help solve these. He always had ready his fishing rods and used them to good advantage for the entire party in the Dras and Tarkand rivers.

News Comes Slowly.

The progress and success of the Roosevelt expedition is being watched with considerable interest by English sportsmen now in India, although the news that filters through is very meager.

It is much the same as it was on the last Everest expedition when the news India received of the mountain climbing was dated London. Most of the dispatches that have come through up to this time merely said: "All's well with the Roosevelts," or words to that effect.

War on Suggestive Movie Titles Bringing Results

Hollywood, Cal.—The fight against suggestive titles to motion pictures has made definite progress during the last six months, Will H. Hays, director general of the industry, declared on his semi-annual trip to the Hollywood film plants.

"The press books for the coming releases of pictures contain only three objectionable titles," Mr. Hays stated. "The open-door policy of the producers and distributors has met with gratifying response all over the country in the shape of letters of suggestion as to the improvement of motion pictures. Further suggestions from the public are solicited."

LUCY B. PRICE, Secretary.

"The Store That Treats You Right."

"Get in the Well Dressed Circle"

A feature in connection with Club Clothes is the fact that the models are always correct and in good taste. The designing staff steers clear of the extreme, which accounts for the good looking lines of Club Clothes.

We are showing a splendid array of dependable fabrics in the season's choicest colorings. Among them you will find the suit which you will want, which will fit you and which you will enjoy wearing.

And when you consider the low prices at which Club Clothes are sold, you naturally wonder how it is done. The answer is simply this: Club Clothes are manufactured by a large organization with a large sales volume.

The tailoring factories are operated on a highly efficient basis and the cost of manufacture is reduced to a minimum. Let us show you.
